

India State-Wise Crop History, Profitability & Growing-Difficulty Dataset

2020-21 to 2024-25 (5 years) — Major Crops by State, Trend, Profit Ranking, Difficulty, Resource Needs

■ AREA / YIELD / PRODUCTION TREND FIGURES AND PROFIT RANKINGS IN THIS DOCUMENT ARE ESTIMATED / INDICATIVE, NOT OFFICIAL AUDITED STATISTICS. See Section 2 for full methodology.

This document is formatted as one self-contained paragraph per state-crop-year combination, so it can be directly chunked and indexed by a Retrieval-Augmented Generation (RAG) pipeline. It is a companion to India_Soil_Dataset.pdf and India_Weather_Agriculture_Dataset.pdf, covering crop economics and cultivation difficulty rather than soil or weather.

1. What This Dataset Contains

For 30 major states, this dataset lists each state's top 4 most-grown crops (by area), and for each crop gives 5 years of area/yield/production trend (2020-21 to 2024-25), growing Season (Kharif/Rabi/Zaid/Perennial), Water Requirement, Growing Difficulty, Labor Requirement, a Profit Ranking (High/Medium-High/Medium/Low-Medium/Low), and resource-availability notes (e.g. water intensity, labour intensity, disease-proneness).

2. Data Sources and Method — Read Before Using

Which crops are grown in which state is real, well-documented information, consistent with the Ministry of Agriculture & Farmers Welfare's Area-Production-Yield (APY) statistics and state agriculture department reports (e.g. Punjab/Haryana = wheat-rice belt; Maharashtra/Gujarat = cotton; West Bengal/Assam = rice-tea-jute; Kerala = rice-coconut-rubber-spices; Jammu & Kashmir = apple-saffron). This part of the dataset is grounded in genuine agricultural geography.

Season, Water Requirement, Growing Difficulty, Labor Requirement and Resource Notes are drawn from standard, published agronomy characteristics of each crop (e.g. rice needs standing water and is labour-intensive to transplant; sugarcane is the heaviest water-user among common field crops and takes 12-18 months to mature; pulses are nitrogen-fixing and drought-tolerant with low input needs; saffron is extremely labour-intensive to hand-harvest and confined to a narrow climatic niche). This reflects genuine agronomic knowledge, not invented detail.

■ **Est_Area_000_ha, Est_Yield_tonnes_per_ha and Est_Production_000_tonnes for each year are ESTIMATED / SYNTHETIC TREND VALUES**, not official Ministry of Agriculture statistics. They start from a plausible indicative baseline for each crop and are projected across 2020-21 to 2024-25 with small year-on-year variation to illustrate a realistic trend shape. They should NOT be quoted as official production figures.

■ **Profit_Ranking is an INDICATIVE, relative ranking** (High / Medium-High / Medium / Low-Medium / Low), based on generally known patterns of Minimum Support Price (MSP) levels, market price volatility, and per-hectare returns reported in agricultural economics literature (e.g. spices, saffron, cotton and horticulture crops are generally understood to have higher per-hectare returns than staple cereals like bajra or fodder crops). It is NOT the output of an audited farm-income survey and does not account for

input-cost inflation, local market access, or year-specific price shocks.

For official, authoritative figures, consult: Ministry of Agriculture & Farmers Welfare APY database (eands.dacnet.nic.in / agricoop.nic.in); state Agriculture Department annual reports; Commission for Agricultural Costs and Prices (CACP) reports for MSP and cost-of-cultivation data; and NABARD / ICAR farm economics studies for real profitability analysis.

3. Growing Difficulty & Resource-Intensity Reference (by Crop)

Crop	Season	Water Need	Difficulty	Labor Need	Profit Rank
Apple	Perennial (temperate)	Medium	Hard	High	High
Bajra	Varies	Medium	Medium	Medium	Medium
Bajra (Pearl Millet)	Kharif	Low	Easy	Low	Low
Banana	Perennial	High	Medium-Hard	High	High
Cardamom (Large)	Perennial	High	Hard	High	High
Cashew	Perennial	Low-Medium	Easy-Medium	Medium	Medium
Chilli	Kharif/Rabi (both)	Medium	Medium-Hard	High	Medium-High
Coconut	Perennial	Medium-High	Easy-Medium	Medium	Medium
Coffee	Perennial	High	Hard	Very High	High
Cotton	Kharif	High	Hard	High	High
Fodder Crops	Multiple (year-round)	Medium	Easy	Low-Medium	Low
Ginger	Kharif	Medium-High	Medium-Hard	High	Medium-High
Gram	Rabi	Low	Easy	Low	Low-Medium
Groundnut	Kharif	Medium	Medium	Medium	Medium
Guar	Kharif	Low	Easy	Low	Low-Medium
Jute	Kharif	High	Medium-Hard	High	Low-Medium
Maize	Kharif/Rabi (both)	Medium	Easy	Medium	Medium
Millets	Kharif	Low	Easy	Low	Low-Medium
Mustard	Rabi	Low-Medium	Easy	Low-Medium	Low-Medium
Oilseeds	Rabi/Kharif (varies)	Low-Medium	Easy-Medium	Medium	Low-Medium
Onion	Rabi/Kharif (both)	Medium	Medium	High	Medium-High
Pineapple	Perennial	Medium	Medium	Medium-High	Medium
Potato	Rabi	Medium-High	Medium	High	Medium
Pulses	Rabi/Kharif (varies)	Low	Easy	Low-Medium	Low-Medium
Ragi (Finger Millet)	Kharif	Low	Easy	Low-Medium	Low-Medium
Rice	Kharif	Very High	Medium-Hard	High	Medium
Rubber	Perennial	High	Hard	High	Medium
Saffron	Rabi (Autumn-flowering)	Low	Very Hard	Very High	High
Soybean	Kharif	Medium	Easy-Medium	Medium	Medium
Spices (Pepper/Cardamom)	Perennial	High	Hard	Very High	High
Sugarcane	Year-round (12-18 month crop)	Very High	Hard	Very High	Medium-High
Tea	Perennial	High	Hard	Very High	Medium

Crop	Season	Water Need	Difficulty	Labor Need	Profit Rank
Turmeric	Kharif	Medium-High	Medium	High	High
Vegetables	Multiple (year-round)	Medium-High	Medium	High	Medium-High
Wheat	Rabi	Medium	Easy-Medium	Medium	Medium

4. State-Wise Crop History Profiles (2020-21 to 2024-25)

Each entry below is a standalone paragraph covering one crop's 5-year estimated trend for one state, plus its season, resource needs, difficulty and profit ranking.

Andhra Pradesh

Rice in Andhra Pradesh (ranked #1 most-grown crop in the state). Growing season: Kharif. Water requirement: Very High. Growing difficulty: Medium-Hard. Labor requirement: High. Profit ranking: Medium (indicative, relative to other crops). Resource notes: Standing water for most of the cycle, labour-intensive transplanting. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 1622.5 '000 ha, est. yield 1.75 t/ha, est. production 2839.4 '000 tonnes; 2021-22: est. area 1747.9 '000 ha, est. yield 1.74 t/ha, est. production 3041.3 '000 tonnes; 2022-23: est. area 1537.0 '000 ha, est. yield 1.72 t/ha, est. production 2643.6 '000 tonnes; 2023-24: est. area 1526.9 '000 ha, est. yield 1.89 t/ha, est. production 2885.8 '000 tonnes; 2024-25: est. area 1932.0 '000 ha, est. yield 1.69 t/ha, est. production 3265.1 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Chilli in Andhra Pradesh (ranked #2 most-grown crop in the state). Growing season: Kharif/Rabi (both). Water requirement: Medium. Growing difficulty: Medium-Hard. Labor requirement: High. Profit ranking: Medium-High (indicative, relative to other crops). Resource notes: Pest-prone, labour-intensive picking, price-volatile. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 957.9 '000 ha, est. yield 2.54 t/ha, est. production 2433.1 '000 tonnes; 2021-22: est. area 992.2 '000 ha, est. yield 2.51 t/ha, est. production 2490.4 '000 tonnes; 2022-23: est. area 1058.5 '000 ha, est. yield 2.48 t/ha, est. production 2625.1 '000 tonnes; 2023-24: est. area 991.1 '000 ha, est. yield 2.39 t/ha, est. production 2368.7 '000 tonnes; 2024-25: est. area 922.7 '000 ha, est. yield 2.94 t/ha, est. production 2712.7 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Cotton in Andhra Pradesh (ranked #3 most-grown crop in the state). Growing season: Kharif. Water requirement: High. Growing difficulty: Hard. Labor requirement: High. Profit ranking: High (indicative, relative to other crops). Resource notes: Long duration (5-6 months), pest-prone (bollworm), needs consistent irrigation. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 912.3 '000 ha, est. yield 1.12 t/ha, est. production 1021.8 '000 tonnes; 2021-22: est. area 919.8 '000 ha, est. yield 1.14 t/ha, est. production 1048.6 '000 tonnes; 2022-23: est. area 944.5 '000 ha, est. yield 1.14 t/ha, est. production 1076.7 '000 tonnes; 2023-24: est. area 875.4 '000 ha, est. yield 1.15 t/ha, est. production 1006.7 '000 tonnes; 2024-25: est. area 983.0 '000 ha, est. yield 1.29 t/ha, est. production 1268.1 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Groundnut in Andhra Pradesh (ranked #4 most-grown crop in the state). Growing season: Kharif. Water requirement: Medium. Growing difficulty: Medium. Labor requirement: Medium. Profit ranking: Medium (indicative, relative to other crops). Resource notes: Needs well-drained sandy soil, moderate water. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 1739.3 '000 ha, est. yield 1.58 t/ha, est. production 2748.1 '000 tonnes; 2021-22: est. area 1742.4 '000 ha, est. yield 1.57 t/ha, est. production 2735.6 '000 tonnes; 2022-23: est. area 1803.3 '000 ha, est. yield 1.54 t/ha, est. production 2777.1 '000 tonnes; 2023-24: est. area 1946.2 '000 ha, est. yield 1.62 t/ha, est. production 3152.8 '000 tonnes; 2024-25: est. area 1938.6 '000 ha, est. yield 1.62 t/ha, est. production 3140.5 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Arunachal Pradesh

Rice in Arunachal Pradesh (ranked #1 most-grown crop in the state). Growing season: Kharif. Water requirement: Very High. Growing difficulty: Medium-Hard. Labor requirement: High. Profit ranking: Medium

(indicative, relative to other crops). Resource notes: Standing water for most of the cycle, labour-intensive transplanting. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 943.8 '000 ha, est. yield 1.57 t/ha, est. production 1481.8 '000 tonnes; 2021-22: est. area 939.4 '000 ha, est. yield 1.56 t/ha, est. production 1465.5 '000 tonnes; 2022-23: est. area 1033.7 '000 ha, est. yield 1.66 t/ha, est. production 1715.9 '000 tonnes; 2023-24: est. area 968.9 '000 ha, est. yield 1.51 t/ha, est. production 1463.0 '000 tonnes; 2024-25: est. area 847.7 '000 ha, est. yield 1.54 t/ha, est. production 1305.5 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Maize in Arunachal Pradesh (ranked #2 most-grown crop in the state). Growing season: Kharif/Rabi (both). Water requirement: Medium. Growing difficulty: Easy. Labor requirement: Medium. Profit ranking: Medium (indicative, relative to other crops). Resource notes: Relatively hardy, moderate water needs, short duration. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 995.2 '000 ha, est. yield 1.1 t/ha, est. production 1094.7 '000 tonnes; 2021-22: est. area 1070.9 '000 ha, est. yield 1.14 t/ha, est. production 1220.8 '000 tonnes; 2022-23: est. area 966.5 '000 ha, est. yield 1.16 t/ha, est. production 1121.1 '000 tonnes; 2023-24: est. area 1167.8 '000 ha, est. yield 1.08 t/ha, est. production 1261.2 '000 tonnes; 2024-25: est. area 961.5 '000 ha, est. yield 1.13 t/ha, est. production 1086.5 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Millets in Arunachal Pradesh (ranked #3 most-grown crop in the state). Growing season: Kharif. Water requirement: Low. Growing difficulty: Easy. Labor requirement: Low. Profit ranking: Low-Medium (indicative, relative to other crops). Resource notes: Highly drought and climate resilient, low input cost. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 795.5 '000 ha, est. yield 2.92 t/ha, est. production 2322.9 '000 tonnes; 2021-22: est. area 804.9 '000 ha, est. yield 2.94 t/ha, est. production 2366.4 '000 tonnes; 2022-23: est. area 835.7 '000 ha, est. yield 3.01 t/ha, est. production 2515.5 '000 tonnes; 2023-24: est. area 828.3 '000 ha, est. yield 3.22 t/ha, est. production 2667.1 '000 tonnes; 2024-25: est. area 663.9 '000 ha, est. yield 3.04 t/ha, est. production 2018.3 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Ginger in Arunachal Pradesh (ranked #4 most-grown crop in the state). Growing season: Kharif. Water requirement: Medium-High. Growing difficulty: Medium-Hard. Labor requirement: High. Profit ranking: Medium-High (indicative, relative to other crops). Resource notes: Needs well-drained soil, disease-prone (rhizome rot), labour-intensive. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 918.7 '000 ha, est. yield 1.29 t/ha, est. production 1185.1 '000 tonnes; 2021-22: est. area 919.4 '000 ha, est. yield 1.33 t/ha, est. production 1222.8 '000 tonnes; 2022-23: est. area 975.5 '000 ha, est. yield 1.29 t/ha, est. production 1258.4 '000 tonnes; 2023-24: est. area 1161.1 '000 ha, est. yield 1.53 t/ha, est. production 1776.5 '000 tonnes; 2024-25: est. area 834.0 '000 ha, est. yield 1.38 t/ha, est. production 1150.9 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Assam

Rice in Assam (ranked #1 most-grown crop in the state). Growing season: Kharif. Water requirement: Very High. Growing difficulty: Medium-Hard. Labor requirement: High. Profit ranking: Medium (indicative, relative to other crops). Resource notes: Standing water for most of the cycle, labour-intensive transplanting. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 798.7 '000 ha, est. yield 1.65 t/ha, est. production 1317.9 '000 tonnes; 2021-22: est. area 773.7 '000 ha, est. yield 1.65 t/ha, est. production 1276.6 '000 tonnes; 2022-23: est. area 826.6 '000 ha, est. yield 1.63 t/ha, est. production 1347.4 '000 tonnes; 2023-24: est. area 854.5 '000 ha, est. yield 1.63 t/ha, est. production 1392.8 '000 tonnes; 2024-25: est. area 922.0 '000 ha, est. yield 1.62 t/ha, est. production 1493.6 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Tea in Assam (ranked #2 most-grown crop in the state). Growing season: Perennial. Water requirement: High. Growing difficulty: Hard. Labor requirement: Very High. Profit ranking: Medium (indicative, relative to other crops). Resource notes: Perennial plantation crop, needs consistent rainfall/irrigation and skilled plucking labour. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 605.5 '000 ha, est. yield 1.7 t/ha, est. production 1029.3 '000 tonnes; 2021-22: est. area 609.1 '000 ha, est. yield 1.68 t/ha, est. production 1023.3 '000 tonnes; 2022-23: est. area 659.3 '000 ha, est. yield 1.65 t/ha, est. production 1087.8 '000 tonnes; 2023-24: est. area 615.5 '000 ha, est. yield 1.74 t/ha, est. production 1071.0 '000 tonnes; 2024-25: est. area 583.1 '000 ha, est. yield 1.64 t/ha, est. production 956.3 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Jute in Assam (ranked #3 most-grown crop in the state). Growing season: Kharif. Water requirement: High. Growing difficulty: Medium-Hard. Labor requirement: High. Profit ranking: Low-Medium (indicative, relative to other crops). Resource notes: Needs standing water for retting process, labour-intensive. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 658.6 '000 ha, est. yield 2.21 t/ha, est. production 1455.5 '000 tonnes; 2021-22: est. area 674.7 '000 ha, est. yield 2.22 t/ha, est. production 1497.8 '000 tonnes; 2022-23: est. area 615.5 '000 ha, est. yield 2.21 t/ha, est. production 1360.3 '000 tonnes; 2023-24: est. area 749.3 '000 ha, est. yield 2.35 t/ha, est. production 1760.9 '000 tonnes; 2024-25: est. area 706.3 '000 ha, est. yield 2.14 t/ha, est. production 1511.5 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Mustard in Assam (ranked #4 most-grown crop in the state). Growing season: Rabi. Water requirement: Low-Medium. Growing difficulty: Easy. Labor requirement: Low-Medium. Profit ranking: Low-Medium (indicative, relative to other crops). Resource notes: Low water requirement, cold-tolerant oilseed. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 1080.1 '000 ha, est. yield 1.15 t/ha, est. production 1242.1 '000 tonnes; 2021-22: est. area 1148.6 '000 ha, est. yield 1.17 t/ha, est. production 1343.9 '000 tonnes; 2022-23: est. area 1201.7 '000 ha, est. yield 1.15 t/ha, est. production 1382.0 '000 tonnes; 2023-24: est. area 1243.7 '000 ha, est. yield 1.14 t/ha, est. production 1417.8 '000 tonnes; 2024-25: est. area 1147.6 '000 ha, est. yield 1.45 t/ha, est. production 1664.0 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Bihar

Rice in Bihar (ranked #1 most-grown crop in the state). Growing season: Kharif. Water requirement: Very High. Growing difficulty: Medium-Hard. Labor requirement: High. Profit ranking: Medium (indicative, relative to other crops). Resource notes: Standing water for most of the cycle, labour-intensive transplanting. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 1676.4 '000 ha, est. yield 1.14 t/ha, est. production 1911.1 '000 tonnes; 2021-22: est. area 1758.5 '000 ha, est. yield 1.15 t/ha, est. production 2022.3 '000 tonnes; 2022-23: est. area 1673.6 '000 ha, est. yield 1.15 t/ha, est. production 1924.6 '000 tonnes; 2023-24: est. area 1692.5 '000 ha, est. yield 1.17 t/ha, est. production 1980.2 '000 tonnes; 2024-25: est. area 1735.8 '000 ha, est. yield 1.16 t/ha, est. production 2013.5 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Wheat in Bihar (ranked #2 most-grown crop in the state). Growing season: Rabi. Water requirement: Medium. Growing difficulty: Easy-Medium. Labor requirement: Medium. Profit ranking: Medium (indicative, relative to other crops). Resource notes: Needs 4-6 irrigations, moderate frost tolerance. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 524.7 '000 ha, est. yield 1.1 t/ha, est. production 577.2 '000 tonnes; 2021-22: est. area 518.6 '000 ha, est. yield 1.12 t/ha, est. production 580.8 '000 tonnes; 2022-23: est. area 592.0 '000 ha, est. yield 1.06 t/ha, est. production 627.5 '000 tonnes; 2023-24: est. area 546.6 '000 ha, est. yield 1.09 t/ha, est. production 595.8 '000 tonnes; 2024-25: est. area 459.1 '000 ha, est. yield 1.21 t/ha, est. production 555.5 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Maize in Bihar (ranked #3 most-grown crop in the state). Growing season: Kharif/Rabi (both). Water requirement: Medium. Growing difficulty: Easy. Labor requirement: Medium. Profit ranking: Medium (indicative, relative to other crops). Resource notes: Relatively hardy, moderate water needs, short duration. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 1205.0 '000 ha, est. yield 2.27 t/ha, est. production 2735.3 '000 tonnes; 2021-22: est. area 1209.6 '000 ha, est. yield 2.29 t/ha, est. production 2770.0 '000 tonnes; 2022-23: est. area 1173.2 '000 ha, est. yield 2.21 t/ha, est. production 2592.8 '000 tonnes; 2023-24: est. area 1435.4 '000 ha, est. yield 2.27 t/ha, est. production 3258.4 '000 tonnes; 2024-25: est. area 1349.6 '000 ha, est. yield 2.36 t/ha, est. production 3185.1 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Pulses in Bihar (ranked #4 most-grown crop in the state). Growing season: Rabi/Kharif (varies). Water requirement: Low. Growing difficulty: Easy. Labor requirement: Low-Medium. Profit ranking: Low-Medium (indicative, relative to other crops). Resource notes: Nitrogen-fixing, drought-tolerant, low input cost. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 1037.3 '000 ha, est. yield 2.83 t/ha, est. production 2935.6 '000 tonnes; 2021-22: est. area 1053.3 '000 ha, est. yield 2.86 t/ha, est. production 3012.4 '000 tonnes; 2022-23: est. area 1155.2 '000 ha, est. yield 2.97 t/ha, est. production 3430.9 '000 tonnes; 2023-24: est. area 1138.4 '000 ha, est. yield 2.82 t/ha, est. production 3210.3 '000 tonnes; 2024-25: est. area 951.1 '000 ha, est. yield 3.17 t/ha, est. production 3015.0 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Chhattisgarh

Rice in Chhattisgarh (ranked #1 most-grown crop in the state). Growing season: Kharif. Water requirement: Very High. Growing difficulty: Medium-Hard. Labor requirement: High. Profit ranking: Medium (indicative, relative to other crops). Resource notes: Standing water for most of the cycle, labour-intensive transplanting. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 312.3 '000 ha, est. yield 1.34 t/ha, est. production 418.5 '000 tonnes; 2021-22: est. area 296.9 '000 ha, est. yield 1.39 t/ha, est. production 412.7 '000 tonnes; 2022-23: est. area 329.8 '000 ha, est. yield 1.43 t/ha, est. production 471.6 '000 tonnes; 2023-24: est. area 392.7 '000 ha, est. yield 1.39 t/ha, est. production 545.9 '000 tonnes; 2024-25: est. area 271.8 '000 ha, est. yield 1.3 t/ha, est. production 353.3 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Maize in Chhattisgarh (ranked #2 most-grown crop in the state). Growing season: Kharif/Rabi (both). Water requirement: Medium. Growing difficulty: Easy. Labor requirement: Medium. Profit ranking: Medium (indicative, relative to other crops). Resource notes: Relatively hardy, moderate water needs, short duration. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 697.5 '000 ha, est. yield 2.56 t/ha, est. production 1785.6 '000 tonnes; 2021-22: est. area 718.6 '000 ha, est. yield 2.51 t/ha, est. production 1803.7 '000 tonnes; 2022-23: est. area 738.4 '000 ha, est. yield 2.6 t/ha, est. production 1919.8 '000 tonnes; 2023-24: est. area 719.9 '000 ha, est. yield 2.63 t/ha, est. production 1893.3 '000 tonnes; 2024-25: est. area 708.2 '000 ha, est. yield 2.54 t/ha, est. production 1798.8 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Pulses in Chhattisgarh (ranked #3 most-grown crop in the state). Growing season: Rabi/Kharif (varies). Water requirement: Low. Growing difficulty: Easy. Labor requirement: Low-Medium. Profit ranking: Low-Medium (indicative, relative to other crops). Resource notes: Nitrogen-fixing, drought-tolerant, low input cost. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 546.5 '000 ha, est. yield 1.26 t/ha, est. production 688.6 '000 tonnes; 2021-22: est. area 579.1 '000 ha, est. yield 1.29 t/ha, est. production 747.0 '000 tonnes; 2022-23: est. area 546.1 '000 ha, est. yield 1.36 t/ha, est. production 742.7 '000 tonnes; 2023-24: est. area 577.1 '000 ha, est. yield 1.29 t/ha, est. production 744.5 '000 tonnes; 2024-25: est. area 571.5 '000 ha, est. yield 1.32 t/ha, est. production 754.4 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Groundnut in Chhattisgarh (ranked #4 most-grown crop in the state). Growing season: Kharif. Water requirement: Medium. Growing difficulty: Medium. Labor requirement: Medium. Profit ranking: Medium (indicative, relative to other crops). Resource notes: Needs well-drained sandy soil, moderate water. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 850.7 '000 ha, est. yield 2.77 t/ha, est. production 2356.4 '000 tonnes; 2021-22: est. area 925.9 '000 ha, est. yield 2.8 t/ha, est. production 2592.5 '000 tonnes; 2022-23: est. area 872.7 '000 ha, est. yield 2.89 t/ha, est. production 2522.1 '000 tonnes; 2023-24: est. area 960.3 '000 ha, est. yield 2.67 t/ha, est. production 2564.0 '000 tonnes; 2024-25: est. area 898.6 '000 ha, est. yield 3.1 t/ha, est. production 2785.7 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Delhi

Wheat in Delhi (ranked #1 most-grown crop in the state). Growing season: Rabi. Water requirement: Medium. Growing difficulty: Easy-Medium. Labor requirement: Medium. Profit ranking: Medium (indicative, relative to other crops). Resource notes: Needs 4-6 irrigations, moderate frost tolerance. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 740.6 '000 ha, est. yield 1.65 t/ha, est. production 1222.0 '000 tonnes; 2021-22: est. area 818.2 '000 ha, est. yield 1.69 t/ha, est. production 1382.8 '000 tonnes; 2022-23: est. area 855.1 '000 ha, est. yield 1.63 t/ha, est. production 1393.8 '000 tonnes; 2023-24: est. area 892.1 '000 ha, est. yield 1.87 t/ha, est. production 1668.2 '000 tonnes; 2024-25: est. area 958.6 '000 ha, est. yield 1.72 t/ha, est. production 1648.8 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Vegetables in Delhi (ranked #2 most-grown crop in the state). Growing season: Multiple (year-round). Water requirement: Medium-High. Growing difficulty: Medium. Labor requirement: High. Profit ranking: Medium-High (indicative, relative to other crops). Resource notes: Perishable, price-volatile, needs frequent irrigation and market access. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 348.0 '000 ha, est. yield 1.79 t/ha, est. production 622.9 '000 tonnes; 2021-22: est. area 356.0 '000 ha, est. yield 1.77 t/ha, est. production 630.1 '000 tonnes; 2022-23: est. area 358.6 '000 ha, est. yield 1.81 t/ha, est. production 649.1 '000 tonnes; 2023-24: est. area 435.9 '000 ha, est. yield 1.99 t/ha, est. production 867.4 '000 tonnes; 2024-25: est. area 374.7 '000 ha, est. yield 2.04 t/ha, est. production 764.4 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Bajra in Delhi (ranked #3 most-grown crop in the state). Growing season: Varies. Water requirement: Medium. Growing difficulty: Medium. Labor requirement: Medium. Profit ranking: Medium (indicative, relative to other crops). Resource notes: General regional crop. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 692.0 '000 ha, est. yield 1.61 t/ha, est. production 1114.1 '000 tonnes; 2021-22: est. area 700.0 '000 ha, est. yield 1.58 t/ha, est. production 1106.0 '000 tonnes; 2022-23: est. area 724.9 '000 ha, est. yield 1.75 t/ha, est. production 1268.6 '000 tonnes; 2023-24: est. area 686.7 '000 ha, est. yield 1.68 t/ha, est. production 1153.7 '000 tonnes; 2024-25: est. area 673.0 '000 ha, est. yield 1.53 t/ha, est. production 1029.7 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Fodder Crops in Delhi (ranked #4 most-grown crop in the state). Growing season: Multiple (year-round). Water requirement: Medium. Growing difficulty: Easy. Labor requirement: Low-Medium. Profit ranking: Low (indicative, relative to other crops). Resource notes: Grown mainly for livestock feed, generally low-input. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 369.9 '000 ha, est. yield 1.21 t/ha, est. production 447.6 '000 tonnes; 2021-22: est. area 369.4 '000 ha, est. yield 1.24 t/ha, est. production 458.1 '000 tonnes; 2022-23: est. area 377.3 '000 ha, est. yield 1.27 t/ha, est. production 479.2 '000 tonnes; 2023-24: est. area 402.7 '000 ha, est. yield 1.26 t/ha, est. production 507.4 '000 tonnes; 2024-25: est. area 429.8 '000 ha, est. yield 1.2 t/ha, est. production 515.8 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Goa

Rice in Goa (ranked #1 most-grown crop in the state). Growing season: Kharif. Water requirement: Very High. Growing difficulty: Medium-Hard. Labor requirement: High. Profit ranking: Medium (indicative, relative to other crops). Resource notes: Standing water for most of the cycle, labour-intensive transplanting. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 892.3 '000 ha, est. yield 1.58 t/ha, est. production 1409.8 '000 tonnes; 2021-22: est. area 911.8 '000 ha, est. yield 1.57 t/ha, est. production 1431.5 '000 tonnes; 2022-23: est. area 858.3 '000 ha, est. yield 1.53 t/ha, est. production 1313.2 '000 tonnes; 2023-24: est. area 906.6 '000 ha, est. yield 1.45 t/ha, est. production 1314.6 '000 tonnes; 2024-25: est. area 821.6 '000 ha, est. yield 1.44 t/ha, est. production 1183.1 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Cashew in Goa (ranked #2 most-grown crop in the state). Growing season: Perennial. Water requirement: Low-Medium. Growing difficulty: Easy-Medium. Labor requirement: Medium. Profit ranking: Medium (indicative, relative to other crops). Resource notes: Hardy perennial tree crop, tolerant of poor soils. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 1231.6 '000 ha, est. yield 1.44 t/ha, est. production 1773.5 '000 tonnes; 2021-22: est. area 1231.1 '000 ha, est. yield 1.48 t/ha, est. production 1822.0 '000 tonnes; 2022-23: est. area 1265.0 '000 ha, est. yield 1.45 t/ha, est. production 1834.2 '000 tonnes; 2023-24: est. area 1514.1 '000 ha, est. yield 1.46 t/ha, est. production 2210.6 '000 tonnes; 2024-25: est. area 1160.8 '000 ha, est. yield 1.35 t/ha, est. production 1567.1 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Coconut in Goa (ranked #3 most-grown crop in the state). Growing season: Perennial. Water requirement: Medium-High. Growing difficulty: Easy-Medium. Labor requirement: Medium. Profit ranking: Medium (indicative, relative to other crops). Resource notes: Perennial tree crop, low annual input once established. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 1255.4 '000 ha, est. yield 2.35 t/ha, est. production 2950.2 '000 tonnes; 2021-22: est. area 1300.7 '000 ha, est. yield 2.4 t/ha, est. production 3121.7 '000 tonnes; 2022-23: est. area 1257.2 '000 ha, est. yield 2.45 t/ha, est. production 3080.1 '000 tonnes; 2023-24: est. area 1400.6 '000 ha, est. yield 2.17 t/ha, est. production 3039.3 '000 tonnes; 2024-25: est. area 1309.7 '000 ha, est. yield 2.52 t/ha, est. production 3300.4 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Sugarcane in Goa (ranked #4 most-grown crop in the state). Growing season: Year-round (12-18 month crop). Water requirement: Very High. Growing difficulty: Hard. Labor requirement: Very High. Profit ranking: Medium-High (indicative, relative to other crops). Resource notes: Heaviest water user among common crops, needs 12-18 months to mature. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 1712.4 '000 ha, est. yield 2.68 t/ha, est. production 4589.2 '000 tonnes; 2021-22: est. area 1827.9 '000 ha, est. yield 2.59 t/ha, est. production 4734.3 '000 tonnes; 2022-23: est. area 2066.0 '000 ha, est. yield 2.61 t/ha, est. production 5392.3 '000 tonnes; 2023-24: est. area 1975.1 '000 ha, est. yield 2.97 t/ha, est. production 5866.0 '000 tonnes; 2024-25: est. area 2077.5 '000 ha, est. yield 2.82 t/ha, est. production 5858.5 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Gujarat

Cotton in Gujarat (ranked #1 most-grown crop in the state). Growing season: Kharif. Water requirement: High. Growing difficulty: Hard. Labor requirement: High. Profit ranking: High (indicative, relative to other crops). Resource notes: Long duration (5-6 months), pest-prone (bollworm), needs consistent irrigation. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 1559.5 '000 ha, est. yield 2.36 t/ha, est. production 3680.4 '000 tonnes; 2021-22: est. area 1614.8 '000 ha, est. yield 2.38 t/ha, est. production 3843.2 '000 tonnes; 2022-23: est. area 1585.6 '000 ha, est. yield 2.38 t/ha, est. production 3773.7 '000 tonnes; 2023-24: est. area 1472.3 '000 ha, est. yield 2.23 t/ha, est. production 3283.2 '000 tonnes; 2024-25: est. area 1851.4 '000 ha, est. yield 2.42 t/ha, est. production 4480.4 '000 tonnes. [Area/yield/production figures are estimated illustrative

trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Groundnut in Gujarat (ranked #2 most-grown crop in the state). Growing season: Kharif. Water requirement: Medium. Growing difficulty: Medium. Labor requirement: Medium. Profit ranking: Medium (indicative, relative to other crops). Resource notes: Needs well-drained sandy soil, moderate water. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 1023.1 '000 ha, est. yield 1.18 t/ha, est. production 1207.3 '000 tonnes; 2021-22: est. area 1049.0 '000 ha, est. yield 1.2 t/ha, est. production 1258.8 '000 tonnes; 2022-23: est. area 1041.0 '000 ha, est. yield 1.26 t/ha, est. production 1311.7 '000 tonnes; 2023-24: est. area 1106.1 '000 ha, est. yield 1.13 t/ha, est. production 1249.9 '000 tonnes; 2024-25: est. area 991.1 '000 ha, est. yield 1.31 t/ha, est. production 1298.3 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Wheat in Gujarat (ranked #3 most-grown crop in the state). Growing season: Rabi. Water requirement: Medium. Growing difficulty: Easy-Medium. Labor requirement: Medium. Profit ranking: Medium (indicative, relative to other crops). Resource notes: Needs 4-6 irrigations, moderate frost tolerance. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 1307.4 '000 ha, est. yield 2.67 t/ha, est. production 3490.8 '000 tonnes; 2021-22: est. area 1386.2 '000 ha, est. yield 2.68 t/ha, est. production 3715.0 '000 tonnes; 2022-23: est. area 1336.7 '000 ha, est. yield 2.6 t/ha, est. production 3475.4 '000 tonnes; 2023-24: est. area 1721.7 '000 ha, est. yield 2.72 t/ha, est. production 4683.0 '000 tonnes; 2024-25: est. area 1698.6 '000 ha, est. yield 2.64 t/ha, est. production 4484.3 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Sugarcane in Gujarat (ranked #4 most-grown crop in the state). Growing season: Year-round (12-18 month crop). Water requirement: Very High. Growing difficulty: Hard. Labor requirement: Very High. Profit ranking: Medium-High (indicative, relative to other crops). Resource notes: Heaviest water user among common crops, needs 12-18 months to mature. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 854.5 '000 ha, est. yield 2.44 t/ha, est. production 2085.0 '000 tonnes; 2021-22: est. area 839.5 '000 ha, est. yield 2.52 t/ha, est. production 2115.5 '000 tonnes; 2022-23: est. area 906.8 '000 ha, est. yield 2.39 t/ha, est. production 2167.3 '000 tonnes; 2023-24: est. area 867.3 '000 ha, est. yield 2.45 t/ha, est. production 2124.9 '000 tonnes; 2024-25: est. area 919.6 '000 ha, est. yield 2.43 t/ha, est. production 2234.6 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Haryana

Wheat in Haryana (ranked #1 most-grown crop in the state). Growing season: Rabi. Water requirement: Medium. Growing difficulty: Easy-Medium. Labor requirement: Medium. Profit ranking: Medium (indicative, relative to other crops). Resource notes: Needs 4-6 irrigations, moderate frost tolerance. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 1594.1 '000 ha, est. yield 1.72 t/ha, est. production 2741.9 '000 tonnes; 2021-22: est. area 1629.6 '000 ha, est. yield 1.76 t/ha, est. production 2868.1 '000 tonnes; 2022-23: est. area 1640.2 '000 ha, est. yield 1.8 t/ha, est. production 2952.4 '000 tonnes; 2023-24: est. area 1681.8 '000 ha, est. yield 1.85 t/ha, est. production 3111.3 '000 tonnes; 2024-25: est. area 2036.6 '000 ha, est. yield 1.7 t/ha, est. production 3462.2 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Rice in Haryana (ranked #2 most-grown crop in the state). Growing season: Kharif. Water requirement: Very High. Growing difficulty: Medium-Hard. Labor requirement: High. Profit ranking: Medium (indicative, relative to other crops). Resource notes: Standing water for most of the cycle, labour-intensive transplanting. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 1220.8 '000 ha, est. yield 2.35 t/ha, est. production 2868.9 '000 tonnes; 2021-22: est. area 1224.0 '000 ha, est. yield 2.37 t/ha, est. production 2900.9 '000 tonnes; 2022-23: est. area 1338.2 '000 ha, est. yield 2.51 t/ha, est. production 3358.9 '000 tonnes; 2023-24: est. area 1150.0 '000 ha, est. yield 2.31 t/ha, est. production 2656.5 '000 tonnes; 2024-25: est. area 1424.9 '000 ha, est. yield 2.08 t/ha, est. production 2963.8 '000 tonnes. [Area/yield/production figures are estimated illustrative

trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Mustard in Haryana (ranked #3 most-grown crop in the state). Growing season: Rabi. Water requirement: Low-Medium. Growing difficulty: Easy. Labor requirement: Low-Medium. Profit ranking: Low-Medium (indicative, relative to other crops). Resource notes: Low water requirement, cold-tolerant oilseed. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 1259.5 '000 ha, est. yield 1.26 t/ha, est. production 1587.0 '000 tonnes; 2021-22: est. area 1272.4 '000 ha, est. yield 1.27 t/ha, est. production 1615.9 '000 tonnes; 2022-23: est. area 1291.2 '000 ha, est. yield 1.37 t/ha, est. production 1768.9 '000 tonnes; 2023-24: est. area 1286.8 '000 ha, est. yield 1.28 t/ha, est. production 1647.1 '000 tonnes; 2024-25: est. area 1420.8 '000 ha, est. yield 1.3 t/ha, est. production 1847.0 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Sugarcane in Haryana (ranked #4 most-grown crop in the state). Growing season: Year-round (12-18 month crop). Water requirement: Very High. Growing difficulty: Hard. Labor requirement: Very High. Profit ranking: Medium-High (indicative, relative to other crops). Resource notes: Heaviest water user among common crops, needs 12-18 months to mature. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 1226.5 '000 ha, est. yield 2.14 t/ha, est. production 2624.7 '000 tonnes; 2021-22: est. area 1294.0 '000 ha, est. yield 2.19 t/ha, est. production 2833.9 '000 tonnes; 2022-23: est. area 1274.3 '000 ha, est. yield 2.24 t/ha, est. production 2854.4 '000 tonnes; 2023-24: est. area 1262.9 '000 ha, est. yield 2.34 t/ha, est. production 2955.2 '000 tonnes; 2024-25: est. area 1326.8 '000 ha, est. yield 2.33 t/ha, est. production 3091.4 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Himachal Pradesh

Apple in Himachal Pradesh (ranked #1 most-grown crop in the state). Growing season: Perennial (temperate). Water requirement: Medium. Growing difficulty: Hard. Labor requirement: High. Profit ranking: High (indicative, relative to other crops). Resource notes: Needs winter chilling hours, temperate hill climate, high management skill. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 1737.2 '000 ha, est. yield 2.8 t/ha, est. production 4864.2 '000 tonnes; 2021-22: est. area 1835.0 '000 ha, est. yield 2.8 t/ha, est. production 5138.0 '000 tonnes; 2022-23: est. area 1627.0 '000 ha, est. yield 2.82 t/ha, est. production 4588.1 '000 tonnes; 2023-24: est. area 1846.0 '000 ha, est. yield 2.9 t/ha, est. production 5353.4 '000 tonnes; 2024-25: est. area 2189.0 '000 ha, est. yield 2.98 t/ha, est. production 6523.2 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Wheat in Himachal Pradesh (ranked #2 most-grown crop in the state). Growing season: Rabi. Water requirement: Medium. Growing difficulty: Easy-Medium. Labor requirement: Medium. Profit ranking: Medium (indicative, relative to other crops). Resource notes: Needs 4-6 irrigations, moderate frost tolerance. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 1644.5 '000 ha, est. yield 1.67 t/ha, est. production 2746.3 '000 tonnes; 2021-22: est. area 1715.5 '000 ha, est. yield 1.7 t/ha, est. production 2916.3 '000 tonnes; 2022-23: est. area 1726.5 '000 ha, est. yield 1.83 t/ha, est. production 3159.5 '000 tonnes; 2023-24: est. area 1606.2 '000 ha, est. yield 1.71 t/ha, est. production 2746.6 '000 tonnes; 2024-25: est. area 1878.4 '000 ha, est. yield 1.84 t/ha, est. production 3456.3 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Maize in Himachal Pradesh (ranked #3 most-grown crop in the state). Growing season: Kharif/Rabi (both). Water requirement: Medium. Growing difficulty: Easy. Labor requirement: Medium. Profit ranking: Medium (indicative, relative to other crops). Resource notes: Relatively hardy, moderate water needs, short duration. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 1507.4 '000 ha, est. yield 2.28 t/ha, est. production 3436.9 '000 tonnes; 2021-22: est. area 1531.6 '000 ha, est. yield 2.25 t/ha, est. production 3446.1 '000 tonnes; 2022-23: est. area 1566.4 '000 ha, est. yield 2.41 t/ha, est. production 3775.0 '000 tonnes; 2023-24: est. area 1467.0 '000 ha, est. yield 2.32 t/ha, est. production 3403.4 '000 tonnes; 2024-25: est. area

1763.1 '000 ha, est. yield 2.18 t/ha, est. production 3843.6 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Potato in Himachal Pradesh (ranked #4 most-grown crop in the state). Growing season: Rabi. Water requirement: Medium-High. Growing difficulty: Medium. Labor requirement: High. Profit ranking: Medium (indicative, relative to other crops). Resource notes: Needs cool climate, careful storage, disease-prone (blight). 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 256.5 '000 ha, est. yield 2.7 t/ha, est. production 692.6 '000 tonnes; 2021-22: est. area 277.2 '000 ha, est. yield 2.72 t/ha, est. production 754.0 '000 tonnes; 2022-23: est. area 278.6 '000 ha, est. yield 2.77 t/ha, est. production 771.7 '000 tonnes; 2023-24: est. area 274.6 '000 ha, est. yield 3.05 t/ha, est. production 837.5 '000 tonnes; 2024-25: est. area 237.0 '000 ha, est. yield 3.06 t/ha, est. production 725.2 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Jammu And Kashmir

Rice in Jammu And Kashmir (ranked #1 most-grown crop in the state). Growing season: Kharif. Water requirement: Very High. Growing difficulty: Medium-Hard. Labor requirement: High. Profit ranking: Medium (indicative, relative to other crops). Resource notes: Standing water for most of the cycle, labour-intensive transplanting. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 1485.0 '000 ha, est. yield 1.57 t/ha, est. production 2331.5 '000 tonnes; 2021-22: est. area 1427.6 '000 ha, est. yield 1.56 t/ha, est. production 2227.1 '000 tonnes; 2022-23: est. area 1605.9 '000 ha, est. yield 1.66 t/ha, est. production 2665.8 '000 tonnes; 2023-24: est. area 1680.5 '000 ha, est. yield 1.62 t/ha, est. production 2722.4 '000 tonnes; 2024-25: est. area 1695.2 '000 ha, est. yield 1.72 t/ha, est. production 2915.7 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Apple in Jammu And Kashmir (ranked #2 most-grown crop in the state). Growing season: Perennial (temperate). Water requirement: Medium. Growing difficulty: Hard. Labor requirement: High. Profit ranking: High (indicative, relative to other crops). Resource notes: Needs winter chilling hours, temperate hill climate, high management skill. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 613.4 '000 ha, est. yield 2.25 t/ha, est. production 1380.1 '000 tonnes; 2021-22: est. area 606.6 '000 ha, est. yield 2.31 t/ha, est. production 1401.2 '000 tonnes; 2022-23: est. area 629.6 '000 ha, est. yield 2.21 t/ha, est. production 1391.4 '000 tonnes; 2023-24: est. area 672.7 '000 ha, est. yield 2.19 t/ha, est. production 1473.2 '000 tonnes; 2024-25: est. area 595.5 '000 ha, est. yield 2.06 t/ha, est. production 1226.7 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Maize in Jammu And Kashmir (ranked #3 most-grown crop in the state). Growing season: Kharif/Rabi (both). Water requirement: Medium. Growing difficulty: Easy. Labor requirement: Medium. Profit ranking: Medium (indicative, relative to other crops). Resource notes: Relatively hardy, moderate water needs, short duration. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 1604.6 '000 ha, est. yield 2.24 t/ha, est. production 3594.3 '000 tonnes; 2021-22: est. area 1629.9 '000 ha, est. yield 2.31 t/ha, est. production 3765.1 '000 tonnes; 2022-23: est. area 1671.2 '000 ha, est. yield 2.28 t/ha, est. production 3810.3 '000 tonnes; 2023-24: est. area 1790.5 '000 ha, est. yield 2.46 t/ha, est. production 4404.6 '000 tonnes; 2024-25: est. area 1668.1 '000 ha, est. yield 2.29 t/ha, est. production 3819.9 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Saffron in Jammu And Kashmir (ranked #4 most-grown crop in the state). Growing season: Rabi (Autumn-flowering). Water requirement: Low. Growing difficulty: Very Hard. Labor requirement: Very High. Profit ranking: High (indicative, relative to other crops). Resource notes: Extremely labour-intensive hand-harvesting, very high value, narrow climatic niche (Kashmir/Pampore). 5-year estimated trend (2020-21 to 2024-25) -

2020-21: est. area 621.8 '000 ha, est. yield 1.27 t/ha, est. production 789.7 '000 tonnes; 2021-22: est. area 626.8 '000 ha, est. yield 1.29 t/ha, est. production 808.6 '000 tonnes; 2022-23: est. area 615.9 '000 ha, est. yield 1.31 t/ha, est. production 806.8 '000 tonnes; 2023-24: est. area 682.9 '000 ha, est. yield 1.27 t/ha, est. production 867.3 '000 tonnes; 2024-25: est. area 847.9 '000 ha, est. yield 1.36 t/ha, est. production 1153.1 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Jharkhand

Rice in Jharkhand (ranked #1 most-grown crop in the state). Growing season: Kharif. Water requirement: Very High. Growing difficulty: Medium-Hard. Labor requirement: High. Profit ranking: Medium (indicative, relative to other crops). Resource notes: Standing water for most of the cycle, labour-intensive transplanting. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 960.7 '000 ha, est. yield 1.26 t/ha, est. production 1210.5 '000 tonnes; 2021-22: est. area 982.3 '000 ha, est. yield 1.26 t/ha, est. production 1237.7 '000 tonnes; 2022-23: est. area 1089.1 '000 ha, est. yield 1.19 t/ha, est. production 1296.0 '000 tonnes; 2023-24: est. area 960.4 '000 ha, est. yield 1.26 t/ha, est. production 1210.1 '000 tonnes; 2024-25: est. area 1123.5 '000 ha, est. yield 1.38 t/ha, est. production 1550.4 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Maize in Jharkhand (ranked #2 most-grown crop in the state). Growing season: Kharif/Rabi (both). Water requirement: Medium. Growing difficulty: Easy. Labor requirement: Medium. Profit ranking: Medium (indicative, relative to other crops). Resource notes: Relatively hardy, moderate water needs, short duration. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 1178.6 '000 ha, est. yield 1.13 t/ha, est. production 1331.8 '000 tonnes; 2021-22: est. area 1178.6 '000 ha, est. yield 1.16 t/ha, est. production 1367.2 '000 tonnes; 2022-23: est. area 1160.7 '000 ha, est. yield 1.06 t/ha, est. production 1230.3 '000 tonnes; 2023-24: est. area 1210.3 '000 ha, est. yield 1.07 t/ha, est. production 1295.0 '000 tonnes; 2024-25: est. area 1181.1 '000 ha, est. yield 1.22 t/ha, est. production 1440.9 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Pulses in Jharkhand (ranked #3 most-grown crop in the state). Growing season: Rabi/Kharif (varies). Water requirement: Low. Growing difficulty: Easy. Labor requirement: Low-Medium. Profit ranking: Low-Medium (indicative, relative to other crops). Resource notes: Nitrogen-fixing, drought-tolerant, low input cost. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 1626.8 '000 ha, est. yield 2.98 t/ha, est. production 4847.9 '000 tonnes; 2021-22: est. area 1622.5 '000 ha, est. yield 2.96 t/ha, est. production 4802.6 '000 tonnes; 2022-23: est. area 1573.5 '000 ha, est. yield 3.1 t/ha, est. production 4877.9 '000 tonnes; 2023-24: est. area 1630.0 '000 ha, est. yield 2.73 t/ha, est. production 4449.9 '000 tonnes; 2024-25: est. area 1909.8 '000 ha, est. yield 3.08 t/ha, est. production 5882.2 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Oilseeds in Jharkhand (ranked #4 most-grown crop in the state). Growing season: Rabi/Kharif (varies). Water requirement: Low-Medium. Growing difficulty: Easy-Medium. Labor requirement: Medium. Profit ranking: Low-Medium (indicative, relative to other crops). Resource notes: Generally lower water need than cereals. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 892.5 '000 ha, est. yield 1.28 t/ha, est. production 1142.4 '000 tonnes; 2021-22: est. area 943.4 '000 ha, est. yield 1.3 t/ha, est. production 1226.4 '000 tonnes; 2022-23: est. area 950.1 '000 ha, est. yield 1.33 t/ha, est. production 1263.6 '000 tonnes; 2023-24: est. area 830.5 '000 ha, est. yield 1.31 t/ha, est. production 1088.0 '000 tonnes; 2024-25: est. area 936.9 '000 ha, est. yield 1.35 t/ha, est. production 1264.8 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Karnataka

Ragi (Finger Millet) in Karnataka (ranked #1 most-grown crop in the state). Growing season: Kharif. Water requirement: Low. Growing difficulty: Easy. Labor requirement: Low-Medium. Profit ranking: Low-Medium (indicative, relative to other crops). Resource notes: Highly drought and disease resistant. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 318.7 '000 ha, est. yield 2.19 t/ha, est. production 698.0 '000 tonnes; 2021-22: est. area 324.6 '000 ha, est. yield 2.25 t/ha, est. production 730.4 '000 tonnes; 2022-23: est. area 302.4 '000 ha, est. yield 2.23 t/ha, est. production 674.4 '000 tonnes; 2023-24: est. area 319.1 '000 ha, est. yield 2.12 t/ha, est. production 676.5 '000 tonnes; 2024-25: est. area 380.9 '000 ha, est. yield 2.18 t/ha, est. production 830.4 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Maize in Karnataka (ranked #2 most-grown crop in the state). Growing season: Kharif/Rabi (both). Water requirement: Medium. Growing difficulty: Easy. Labor requirement: Medium. Profit ranking: Medium (indicative, relative to other crops). Resource notes: Relatively hardy, moderate water needs, short duration. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 1192.6 '000 ha, est. yield 2.64 t/ha, est. production 3148.5 '000 tonnes; 2021-22: est. area 1189.5 '000 ha, est. yield 2.7 t/ha, est. production 3211.7 '000 tonnes; 2022-23: est. area 1229.5 '000 ha, est. yield 2.76 t/ha, est. production 3393.4 '000 tonnes; 2023-24: est. area 1260.3 '000 ha, est. yield 2.55 t/ha, est. production 3213.8 '000 tonnes; 2024-25: est. area 1275.5 '000 ha, est. yield 2.76 t/ha, est. production 3520.4 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Sugarcane in Karnataka (ranked #3 most-grown crop in the state). Growing season: Year-round (12-18 month crop). Water requirement: Very High. Growing difficulty: Hard. Labor requirement: Very High. Profit ranking: Medium-High (indicative, relative to other crops). Resource notes: Heaviest water user among common crops, needs 12-18 months to mature. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 740.9 '000 ha, est. yield 2.65 t/ha, est. production 1963.4 '000 tonnes; 2021-22: est. area 770.1 '000 ha, est. yield 2.62 t/ha, est. production 2017.7 '000 tonnes; 2022-23: est. area 691.1 '000 ha, est. yield 2.7 t/ha, est. production 1866.0 '000 tonnes; 2023-24: est. area 865.4 '000 ha, est. yield 2.49 t/ha, est. production 2154.8 '000 tonnes; 2024-25: est. area 704.1 '000 ha, est. yield 2.6 t/ha, est. production 1830.7 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Coffee in Karnataka (ranked #4 most-grown crop in the state). Growing season: Perennial. Water requirement: High. Growing difficulty: Hard. Labor requirement: Very High. Profit ranking: High (indicative, relative to other crops). Resource notes: Perennial shade crop, needs consistent rainfall and skilled labour. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 1284.3 '000 ha, est. yield 2.17 t/ha, est. production 2786.9 '000 tonnes; 2021-22: est. area 1332.4 '000 ha, est. yield 2.16 t/ha, est. production 2878.0 '000 tonnes; 2022-23: est. area 1370.4 '000 ha, est. yield 2.13 t/ha, est. production 2919.0 '000 tonnes; 2023-24: est. area 1222.3 '000 ha, est. yield 2.0 t/ha, est. production 2444.6 '000 tonnes; 2024-25: est. area 1720.5 '000 ha, est. yield 2.2 t/ha, est. production 3785.1 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Kerala

Rice in Kerala (ranked #1 most-grown crop in the state). Growing season: Kharif. Water requirement: Very High. Growing difficulty: Medium-Hard. Labor requirement: High. Profit ranking: Medium (indicative, relative to other crops). Resource notes: Standing water for most of the cycle, labour-intensive transplanting. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 700.5 '000 ha, est. yield 2.26 t/ha, est. production 1583.1 '000 tonnes; 2021-22: est. area 711.1 '000 ha, est. yield 2.28 t/ha, est. production 1621.3 '000 tonnes; 2022-23: est. area 737.3 '000 ha, est. yield 2.43 t/ha, est. production 1791.6 '000 tonnes; 2023-24: est. area 741.4 '000 ha, est. yield 2.54 t/ha, est. production 1883.2 '000 tonnes; 2024-25: est. area 675.6 '000 ha, est. yield 2.32 t/ha, est. production 1567.4 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Coconut in Kerala (ranked #2 most-grown crop in the state). Growing season: Perennial. Water requirement: Medium-High. Growing difficulty: Easy-Medium. Labor requirement: Medium. Profit ranking: Medium (indicative, relative to other crops). Resource notes: Perennial tree crop, low annual input once established. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 242.3 '000 ha, est. yield 2.93 t/ha, est. production 709.9 '000 tonnes; 2021-22: est. area 240.5 '000 ha, est. yield 2.97 t/ha, est. production 714.3 '000 tonnes; 2022-23: est. area 242.4 '000 ha, est. yield 2.81 t/ha, est. production 681.1 '000 tonnes; 2023-24: est. area 281.4 '000 ha, est. yield 3.1 t/ha, est. production 872.3 '000 tonnes; 2024-25: est. area 277.9 '000 ha, est. yield 2.93 t/ha, est. production 814.2 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Rubber in Kerala (ranked #3 most-grown crop in the state). Growing season: Perennial. Water requirement: High. Growing difficulty: Hard. Labor requirement: High. Profit ranking: Medium (indicative, relative to other crops). Resource notes: Perennial plantation, 6-7 year gestation before tapping, needs high humidity. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 551.2 '000 ha, est. yield 1.54 t/ha, est. production 848.8 '000 tonnes; 2021-22: est. area 548.1 '000 ha, est. yield 1.56 t/ha, est. production 855.0 '000 tonnes; 2022-23: est. area 550.0 '000 ha, est. yield 1.62 t/ha, est. production 891.0 '000 tonnes; 2023-24: est. area 598.5 '000 ha, est. yield 1.5 t/ha, est. production 897.8 '000 tonnes; 2024-25: est. area 601.8 '000 ha, est. yield 1.56 t/ha, est. production 938.8 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Spices (Pepper/Cardamom) in Kerala (ranked #4 most-grown crop in the state). Growing season: Perennial. Water requirement: High. Growing difficulty: Hard. Labor requirement: Very High. Profit ranking: High (indicative, relative to other crops). Resource notes: Shade-loving perennials, high humidity requirement, labour-intensive. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 399.8 '000 ha, est. yield 2.77 t/ha, est. production 1107.4 '000 tonnes; 2021-22: est. area 402.5 '000 ha, est. yield 2.86 t/ha, est. production 1151.1 '000 tonnes; 2022-23: est. area 472.5 '000 ha, est. yield 3.05 t/ha, est. production 1441.1 '000 tonnes; 2023-24: est. area 426.6 '000 ha, est. yield 2.89 t/ha, est. production 1232.9 '000 tonnes; 2024-25: est. area 516.3 '000 ha, est. yield 2.85 t/ha, est. production 1471.5 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Madhya Pradesh

Soybean in Madhya Pradesh (ranked #1 most-grown crop in the state). Growing season: Kharif. Water requirement: Medium. Growing difficulty: Easy-Medium. Labor requirement: Medium. Profit ranking: Medium (indicative, relative to other crops). Resource notes: Nitrogen-fixing oilseed, moderate water needs. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 1479.3 '000 ha, est. yield 2.29 t/ha, est. production 3387.6 '000 tonnes; 2021-22: est. area 1551.6 '000 ha, est. yield 2.35 t/ha, est. production 3646.3 '000 tonnes; 2022-23: est. area 1600.2 '000 ha, est. yield 2.35 t/ha, est. production 3760.5 '000 tonnes; 2023-24: est. area 1599.8 '000 ha, est. yield 2.32 t/ha, est. production 3711.5 '000 tonnes; 2024-25: est. area 1563.2 '000 ha, est. yield 2.39 t/ha, est. production 3736.0 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Wheat in Madhya Pradesh (ranked #2 most-grown crop in the state). Growing season: Rabi. Water requirement: Medium. Growing difficulty: Easy-Medium. Labor requirement: Medium. Profit ranking: Medium (indicative, relative to other crops). Resource notes: Needs 4-6 irrigations, moderate frost tolerance. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 1354.1 '000 ha, est. yield 1.89 t/ha, est. production 2559.2 '000 tonnes; 2021-22: est. area 1355.4 '000 ha, est. yield 1.97 t/ha, est. production 2670.1 '000 tonnes; 2022-23: est. area 1451.1 '000 ha, est. yield 1.93 t/ha, est. production 2800.6 '000 tonnes; 2023-24: est. area 1393.5 '000 ha, est. yield 1.82 t/ha, est. production 2536.2 '000 tonnes; 2024-25: est. area 1454.2 '000 ha, est. yield 2.11 t/ha, est. production 3068.4 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Gram in Madhya Pradesh (ranked #3 most-grown crop in the state). Growing season: Rabi. Water requirement: Low. Growing difficulty: Easy. Labor requirement: Low. Profit ranking: Low-Medium (indicative, relative to other crops). Resource notes: Drought-tolerant pulse, low input cost. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 1671.1 '000 ha, est. yield 1.77 t/ha, est. production 2957.8 '000 tonnes; 2021-22: est. area 1624.7 '000 ha, est. yield 1.78 t/ha, est. production 2892.0 '000 tonnes; 2022-23: est. area 1652.4 '000 ha, est. yield 1.87 t/ha, est. production 3090.0 '000 tonnes; 2023-24: est. area 1655.6 '000 ha, est. yield 1.89 t/ha, est. production 3129.1 '000 tonnes; 2024-25: est. area 2155.8 '000 ha, est. yield 1.8 t/ha, est. production 3880.4 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Cotton in Madhya Pradesh (ranked #4 most-grown crop in the state). Growing season: Kharif. Water requirement: High. Growing difficulty: Hard. Labor requirement: High. Profit ranking: High (indicative, relative to other crops). Resource notes: Long duration (5-6 months), pest-prone (bollworm), needs consistent irrigation. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 1119.9 '000 ha, est. yield 1.89 t/ha, est. production 2116.6 '000 tonnes; 2021-22: est. area 1157.8 '000 ha, est. yield 1.99 t/ha, est. production 2304.0 '000 tonnes; 2022-23: est. area 1147.5 '000 ha, est. yield 1.92 t/ha, est. production 2203.2 '000 tonnes; 2023-24: est. area 1082.2 '000 ha, est. yield 1.99 t/ha, est. production 2153.6 '000 tonnes; 2024-25: est. area 1043.9 '000 ha, est. yield 1.8 t/ha, est. production 1879.0 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Maharashtra

Cotton in Maharashtra (ranked #1 most-grown crop in the state). Growing season: Kharif. Water requirement: High. Growing difficulty: Hard. Labor requirement: High. Profit ranking: High (indicative, relative to other crops). Resource notes: Long duration (5-6 months), pest-prone (bollworm), needs consistent irrigation. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 1351.6 '000 ha, est. yield 1.91 t/ha, est. production 2581.6 '000 tonnes; 2021-22: est. area 1389.1 '000 ha, est. yield 1.95 t/ha, est. production 2708.7 '000 tonnes; 2022-23: est. area 1572.3 '000 ha, est. yield 1.93 t/ha, est. production 3034.5 '000 tonnes; 2023-24: est. area 1360.6 '000 ha, est. yield 1.81 t/ha, est. production 2462.7 '000 tonnes; 2024-25: est. area 1470.2 '000 ha, est. yield 2.23 t/ha, est. production 3278.5 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Sugarcane in Maharashtra (ranked #2 most-grown crop in the state). Growing season: Year-round (12-18 month crop). Water requirement: Very High. Growing difficulty: Hard. Labor requirement: Very High. Profit ranking: Medium-High (indicative, relative to other crops). Resource notes: Heaviest water user among common crops, needs 12-18 months to mature. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 482.1 '000 ha, est. yield 2.72 t/ha, est. production 1311.3 '000 tonnes; 2021-22: est. area 496.0 '000 ha, est. yield 2.74 t/ha, est. production 1359.0 '000 tonnes; 2022-23: est. area 507.9 '000 ha, est. yield 2.81 t/ha, est. production 1427.2 '000 tonnes; 2023-24: est. area 498.2 '000 ha, est. yield 2.8 t/ha, est. production 1395.0 '000 tonnes; 2024-25: est. area 534.6 '000 ha, est. yield 2.81 t/ha, est. production 1502.2 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Soybean in Maharashtra (ranked #3 most-grown crop in the state). Growing season: Kharif. Water requirement: Medium. Growing difficulty: Easy-Medium. Labor requirement: Medium. Profit ranking: Medium (indicative, relative to other crops). Resource notes: Nitrogen-fixing oilseed, moderate water needs. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 1465.3 '000 ha, est. yield 2.75 t/ha, est. production 4029.6 '000 tonnes; 2021-22: est. area 1420.5 '000 ha, est. yield 2.8 t/ha, est. production 3977.4 '000 tonnes; 2022-23: est. area 1354.9 '000 ha, est. yield 2.65 t/ha, est. production 3590.5 '000 tonnes; 2023-24: est. area 1675.2 '000 ha, est. yield 2.95 t/ha, est. production 4941.8 '000 tonnes; 2024-25: est. area 1558.3 '000 ha, est. yield 2.49 t/ha, est. production 3880.2 '000 tonnes. [Area/yield/production figures are estimated illustrative

trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Onion in Maharashtra (ranked #4 most-grown crop in the state). Growing season: Rabi/Kharif (both). Water requirement: Medium. Growing difficulty: Medium. Labor requirement: High. Profit ranking: Medium-High (indicative, relative to other crops). Resource notes: Price-volatile, storage-sensitive, labour-intensive harvesting. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 1663.9 '000 ha, est. yield 1.08 t/ha, est. production 1797.0 '000 tonnes; 2021-22: est. area 1708.0 '000 ha, est. yield 1.08 t/ha, est. production 1844.6 '000 tonnes; 2022-23: est. area 1614.0 '000 ha, est. yield 1.1 t/ha, est. production 1775.4 '000 tonnes; 2023-24: est. area 1738.4 '000 ha, est. yield 1.04 t/ha, est. production 1807.9 '000 tonnes; 2024-25: est. area 1825.9 '000 ha, est. yield 1.03 t/ha, est. production 1880.7 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Manipur

Rice in Manipur (ranked #1 most-grown crop in the state). Growing season: Kharif. Water requirement: Very High. Growing difficulty: Medium-Hard. Labor requirement: High. Profit ranking: Medium (indicative, relative to other crops). Resource notes: Standing water for most of the cycle, labour-intensive transplanting. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 355.6 '000 ha, est. yield 2.75 t/ha, est. production 977.9 '000 tonnes; 2021-22: est. area 360.5 '000 ha, est. yield 2.74 t/ha, est. production 987.8 '000 tonnes; 2022-23: est. area 365.4 '000 ha, est. yield 2.74 t/ha, est. production 1001.2 '000 tonnes; 2023-24: est. area 402.7 '000 ha, est. yield 2.76 t/ha, est. production 1111.5 '000 tonnes; 2024-25: est. area 365.3 '000 ha, est. yield 2.6 t/ha, est. production 949.8 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Maize in Manipur (ranked #2 most-grown crop in the state). Growing season: Kharif/Rabi (both). Water requirement: Medium. Growing difficulty: Easy. Labor requirement: Medium. Profit ranking: Medium (indicative, relative to other crops). Resource notes: Relatively hardy, moderate water needs, short duration. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 1204.6 '000 ha, est. yield 2.86 t/ha, est. production 3445.2 '000 tonnes; 2021-22: est. area 1241.9 '000 ha, est. yield 2.92 t/ha, est. production 3626.3 '000 tonnes; 2022-23: est. area 1279.6 '000 ha, est. yield 2.93 t/ha, est. production 3749.2 '000 tonnes; 2023-24: est. area 1264.0 '000 ha, est. yield 2.9 t/ha, est. production 3665.6 '000 tonnes; 2024-25: est. area 1424.3 '000 ha, est. yield 2.73 t/ha, est. production 3888.3 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Pulses in Manipur (ranked #3 most-grown crop in the state). Growing season: Rabi/Kharif (varies). Water requirement: Low. Growing difficulty: Easy. Labor requirement: Low-Medium. Profit ranking: Low-Medium (indicative, relative to other crops). Resource notes: Nitrogen-fixing, drought-tolerant, low input cost. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 939.7 '000 ha, est. yield 2.76 t/ha, est. production 2593.6 '000 tonnes; 2021-22: est. area 939.4 '000 ha, est. yield 2.8 t/ha, est. production 2630.3 '000 tonnes; 2022-23: est. area 936.8 '000 ha, est. yield 2.94 t/ha, est. production 2754.2 '000 tonnes; 2023-24: est. area 930.0 '000 ha, est. yield 2.48 t/ha, est. production 2306.4 '000 tonnes; 2024-25: est. area 932.5 '000 ha, est. yield 2.44 t/ha, est. production 2275.3 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Sugarcane in Manipur (ranked #4 most-grown crop in the state). Growing season: Year-round (12-18 month crop). Water requirement: Very High. Growing difficulty: Hard. Labor requirement: Very High. Profit ranking: Medium-High (indicative, relative to other crops). Resource notes: Heaviest water user among common crops, needs 12-18 months to mature. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 1618.2 '000 ha, est. yield 2.41 t/ha, est. production 3899.9 '000 tonnes; 2021-22: est. area 1613.6 '000 ha, est. yield 2.52 t/ha, est. production 4066.3 '000 tonnes; 2022-23: est. area 1715.3 '000 ha, est. yield 2.46 t/ha, est. production 4219.6 '000 tonnes; 2023-24: est. area 1882.3 '000 ha, est. yield 2.87 t/ha, est. production 5402.2 '000 tonnes; 2024-25: est. area 2034.5 '000 ha, est. yield 2.54 t/ha, est. production 5167.6 '000 tonnes.

[Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Meghalaya

Rice in Meghalaya (ranked #1 most-grown crop in the state). Growing season: Kharif. Water requirement: Very High. Growing difficulty: Medium-Hard. Labor requirement: High. Profit ranking: Medium (indicative, relative to other crops). Resource notes: Standing water for most of the cycle, labour-intensive transplanting. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 339.3 '000 ha, est. yield 2.57 t/ha, est. production 872.0 '000 tonnes; 2021-22: est. area 346.6 '000 ha, est. yield 2.55 t/ha, est. production 883.8 '000 tonnes; 2022-23: est. area 351.7 '000 ha, est. yield 2.63 t/ha, est. production 925.0 '000 tonnes; 2023-24: est. area 439.6 '000 ha, est. yield 2.52 t/ha, est. production 1107.8 '000 tonnes; 2024-25: est. area 362.0 '000 ha, est. yield 2.64 t/ha, est. production 955.7 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Maize in Meghalaya (ranked #2 most-grown crop in the state). Growing season: Kharif/Rabi (both). Water requirement: Medium. Growing difficulty: Easy. Labor requirement: Medium. Profit ranking: Medium (indicative, relative to other crops). Resource notes: Relatively hardy, moderate water needs, short duration. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 1664.6 '000 ha, est. yield 2.6 t/ha, est. production 4328.0 '000 tonnes; 2021-22: est. area 1615.9 '000 ha, est. yield 2.58 t/ha, est. production 4169.0 '000 tonnes; 2022-23: est. area 1786.9 '000 ha, est. yield 2.66 t/ha, est. production 4753.2 '000 tonnes; 2023-24: est. area 1612.9 '000 ha, est. yield 2.62 t/ha, est. production 4225.8 '000 tonnes; 2024-25: est. area 1808.5 '000 ha, est. yield 2.82 t/ha, est. production 5100.0 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Turmeric in Meghalaya (ranked #3 most-grown crop in the state). Growing season: Kharif. Water requirement: Medium-High. Growing difficulty: Medium. Labor requirement: High. Profit ranking: High (indicative, relative to other crops). Resource notes: Long duration (8-9 months), labour-intensive harvesting. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 712.1 '000 ha, est. yield 2.85 t/ha, est. production 2029.5 '000 tonnes; 2021-22: est. area 760.9 '000 ha, est. yield 2.76 t/ha, est. production 2100.1 '000 tonnes; 2022-23: est. area 726.3 '000 ha, est. yield 2.94 t/ha, est. production 2135.3 '000 tonnes; 2023-24: est. area 731.0 '000 ha, est. yield 2.8 t/ha, est. production 2046.8 '000 tonnes; 2024-25: est. area 765.3 '000 ha, est. yield 2.97 t/ha, est. production 2272.9 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Ginger in Meghalaya (ranked #4 most-grown crop in the state). Growing season: Kharif. Water requirement: Medium-High. Growing difficulty: Medium-Hard. Labor requirement: High. Profit ranking: Medium-High (indicative, relative to other crops). Resource notes: Needs well-drained soil, disease-prone (rhizome rot), labour-intensive. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 820.2 '000 ha, est. yield 2.93 t/ha, est. production 2403.2 '000 tonnes; 2021-22: est. area 823.1 '000 ha, est. yield 2.97 t/ha, est. production 2444.6 '000 tonnes; 2022-23: est. area 885.8 '000 ha, est. yield 3.09 t/ha, est. production 2737.1 '000 tonnes; 2023-24: est. area 832.8 '000 ha, est. yield 3.18 t/ha, est. production 2648.3 '000 tonnes; 2024-25: est. area 1016.9 '000 ha, est. yield 3.33 t/ha, est. production 3386.3 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Mizoram

Rice in Mizoram (ranked #1 most-grown crop in the state). Growing season: Kharif. Water requirement: Very High. Growing difficulty: Medium-Hard. Labor requirement: High. Profit ranking: Medium (indicative, relative to other crops). Resource notes: Standing water for most of the cycle, labour-intensive transplanting. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 1363.9 '000 ha, est. yield 1.27 t/ha, est. production

1732.2 '000 tonnes; 2021-22: est. area 1335.3 '000 ha, est. yield 1.29 t/ha, est. production 1722.5 '000 tonnes; 2022-23: est. area 1375.1 '000 ha, est. yield 1.28 t/ha, est. production 1760.1 '000 tonnes; 2023-24: est. area 1236.2 '000 ha, est. yield 1.24 t/ha, est. production 1532.9 '000 tonnes; 2024-25: est. area 1472.8 '000 ha, est. yield 1.42 t/ha, est. production 2091.4 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Maize in Mizoram (ranked #2 most-grown crop in the state). Growing season: Kharif/Rabi (both). Water requirement: Medium. Growing difficulty: Easy. Labor requirement: Medium. Profit ranking: Medium (indicative, relative to other crops). Resource notes: Relatively hardy, moderate water needs, short duration. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 497.3 '000 ha, est. yield 1.02 t/ha, est. production 507.2 '000 tonnes; 2021-22: est. area 513.2 '000 ha, est. yield 1.02 t/ha, est. production 523.5 '000 tonnes; 2022-23: est. area 536.0 '000 ha, est. yield 1.11 t/ha, est. production 595.0 '000 tonnes; 2023-24: est. area 526.2 '000 ha, est. yield 0.96 t/ha, est. production 505.2 '000 tonnes; 2024-25: est. area 485.8 '000 ha, est. yield 0.94 t/ha, est. production 456.7 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Ginger in Mizoram (ranked #3 most-grown crop in the state). Growing season: Kharif. Water requirement: Medium-High. Growing difficulty: Medium-Hard. Labor requirement: High. Profit ranking: Medium-High (indicative, relative to other crops). Resource notes: Needs well-drained soil, disease-prone (rhizome rot), labour-intensive. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 274.2 '000 ha, est. yield 1.47 t/ha, est. production 403.1 '000 tonnes; 2021-22: est. area 285.1 '000 ha, est. yield 1.53 t/ha, est. production 436.2 '000 tonnes; 2022-23: est. area 279.3 '000 ha, est. yield 1.46 t/ha, est. production 407.8 '000 tonnes; 2023-24: est. area 282.5 '000 ha, est. yield 1.54 t/ha, est. production 435.1 '000 tonnes; 2024-25: est. area 319.8 '000 ha, est. yield 1.68 t/ha, est. production 537.3 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Turmeric in Mizoram (ranked #4 most-grown crop in the state). Growing season: Kharif. Water requirement: Medium-High. Growing difficulty: Medium. Labor requirement: High. Profit ranking: High (indicative, relative to other crops). Resource notes: Long duration (8-9 months), labour-intensive harvesting. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 1378.2 '000 ha, est. yield 1.69 t/ha, est. production 2329.2 '000 tonnes; 2021-22: est. area 1342.4 '000 ha, est. yield 1.71 t/ha, est. production 2295.5 '000 tonnes; 2022-23: est. area 1460.5 '000 ha, est. yield 1.7 t/ha, est. production 2482.8 '000 tonnes; 2023-24: est. area 1583.3 '000 ha, est. yield 1.71 t/ha, est. production 2707.4 '000 tonnes; 2024-25: est. area 1335.8 '000 ha, est. yield 1.97 t/ha, est. production 2631.5 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Nagaland

Rice in Nagaland (ranked #1 most-grown crop in the state). Growing season: Kharif. Water requirement: Very High. Growing difficulty: Medium-Hard. Labor requirement: High. Profit ranking: Medium (indicative, relative to other crops). Resource notes: Standing water for most of the cycle, labour-intensive transplanting. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 1299.8 '000 ha, est. yield 1.78 t/ha, est. production 2313.6 '000 tonnes; 2021-22: est. area 1339.1 '000 ha, est. yield 1.71 t/ha, est. production 2289.9 '000 tonnes; 2022-23: est. area 1299.1 '000 ha, est. yield 1.79 t/ha, est. production 2325.4 '000 tonnes; 2023-24: est. area 1263.0 '000 ha, est. yield 1.86 t/ha, est. production 2349.2 '000 tonnes; 2024-25: est. area 1615.0 '000 ha, est. yield 1.79 t/ha, est. production 2890.8 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Maize in Nagaland (ranked #2 most-grown crop in the state). Growing season: Kharif/Rabi (both). Water requirement: Medium. Growing difficulty: Easy. Labor requirement: Medium. Profit ranking: Medium (indicative, relative to other crops). Resource notes: Relatively hardy, moderate water needs, short duration. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 1539.1 '000 ha, est. yield 2.7 t/ha, est. production

4155.6 '000 tonnes; 2021-22: est. area 1580.9 '000 ha, est. yield 2.75 t/ha, est. production 4347.5 '000 tonnes; 2022-23: est. area 1535.6 '000 ha, est. yield 2.84 t/ha, est. production 4361.1 '000 tonnes; 2023-24: est. area 1564.1 '000 ha, est. yield 2.63 t/ha, est. production 4113.6 '000 tonnes; 2024-25: est. area 1701.3 '000 ha, est. yield 2.98 t/ha, est. production 5069.9 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Millets in Nagaland (ranked #3 most-grown crop in the state). Growing season: Kharif. Water requirement: Low. Growing difficulty: Easy. Labor requirement: Low. Profit ranking: Low-Medium (indicative, relative to other crops). Resource notes: Highly drought and climate resilient, low input cost. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 1265.2 '000 ha, est. yield 2.59 t/ha, est. production 3276.9 '000 tonnes; 2021-22: est. area 1263.6 '000 ha, est. yield 2.69 t/ha, est. production 3399.1 '000 tonnes; 2022-23: est. area 1312.2 '000 ha, est. yield 2.63 t/ha, est. production 3451.1 '000 tonnes; 2023-24: est. area 1429.9 '000 ha, est. yield 2.81 t/ha, est. production 4018.0 '000 tonnes; 2024-25: est. area 1585.3 '000 ha, est. yield 2.77 t/ha, est. production 4391.3 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Sugarcane in Nagaland (ranked #4 most-grown crop in the state). Growing season: Year-round (12-18 month crop). Water requirement: Very High. Growing difficulty: Hard. Labor requirement: Very High. Profit ranking: Medium-High (indicative, relative to other crops). Resource notes: Heaviest water user among common crops, needs 12-18 months to mature. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 1494.3 '000 ha, est. yield 2.33 t/ha, est. production 3481.7 '000 tonnes; 2021-22: est. area 1586.9 '000 ha, est. yield 2.37 t/ha, est. production 3761.0 '000 tonnes; 2022-23: est. area 1653.2 '000 ha, est. yield 2.52 t/ha, est. production 4166.1 '000 tonnes; 2023-24: est. area 1608.9 '000 ha, est. yield 2.2 t/ha, est. production 3539.6 '000 tonnes; 2024-25: est. area 1404.5 '000 ha, est. yield 2.16 t/ha, est. production 3033.7 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Odisha

Rice in Odisha (ranked #1 most-grown crop in the state). Growing season: Kharif. Water requirement: Very High. Growing difficulty: Medium-Hard. Labor requirement: High. Profit ranking: Medium (indicative, relative to other crops). Resource notes: Standing water for most of the cycle, labour-intensive transplanting. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 317.2 '000 ha, est. yield 1.53 t/ha, est. production 485.3 '000 tonnes; 2021-22: est. area 307.8 '000 ha, est. yield 1.5 t/ha, est. production 461.7 '000 tonnes; 2022-23: est. area 343.0 '000 ha, est. yield 1.51 t/ha, est. production 517.9 '000 tonnes; 2023-24: est. area 332.4 '000 ha, est. yield 1.6 t/ha, est. production 531.8 '000 tonnes; 2024-25: est. area 369.0 '000 ha, est. yield 1.55 t/ha, est. production 572.0 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Groundnut in Odisha (ranked #2 most-grown crop in the state). Growing season: Kharif. Water requirement: Medium. Growing difficulty: Medium. Labor requirement: Medium. Profit ranking: Medium (indicative, relative to other crops). Resource notes: Needs well-drained sandy soil, moderate water. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 1725.7 '000 ha, est. yield 2.16 t/ha, est. production 3727.5 '000 tonnes; 2021-22: est. area 1818.8 '000 ha, est. yield 2.18 t/ha, est. production 3965.0 '000 tonnes; 2022-23: est. area 1718.2 '000 ha, est. yield 2.17 t/ha, est. production 3728.5 '000 tonnes; 2023-24: est. area 1795.8 '000 ha, est. yield 2.32 t/ha, est. production 4166.3 '000 tonnes; 2024-25: est. area 1541.2 '000 ha, est. yield 2.07 t/ha, est. production 3190.3 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Pulses in Odisha (ranked #3 most-grown crop in the state). Growing season: Rabi/Kharif (varies). Water requirement: Low. Growing difficulty: Easy. Labor requirement: Low-Medium. Profit ranking: Low-Medium (indicative, relative to other crops). Resource notes: Nitrogen-fixing, drought-tolerant, low input cost. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 465.5 '000 ha, est. yield 2.24 t/ha, est. production

1042.7 '000 tonnes; 2021-22: est. area 484.7 '000 ha, est. yield 2.35 t/ha, est. production 1139.0 '000 tonnes; 2022-23: est. area 477.7 '000 ha, est. yield 2.25 t/ha, est. production 1074.8 '000 tonnes; 2023-24: est. area 548.7 '000 ha, est. yield 2.37 t/ha, est. production 1300.4 '000 tonnes; 2024-25: est. area 544.9 '000 ha, est. yield 2.24 t/ha, est. production 1220.6 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Jute in Odisha (ranked #4 most-grown crop in the state). Growing season: Kharif. Water requirement: High. Growing difficulty: Medium-Hard. Labor requirement: High. Profit ranking: Low-Medium (indicative, relative to other crops). Resource notes: Needs standing water for retting process, labour-intensive. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 371.2 '000 ha, est. yield 2.64 t/ha, est. production 980.0 '000 tonnes; 2021-22: est. area 356.1 '000 ha, est. yield 2.7 t/ha, est. production 961.5 '000 tonnes; 2022-23: est. area 381.8 '000 ha, est. yield 2.74 t/ha, est. production 1046.1 '000 tonnes; 2023-24: est. area 418.2 '000 ha, est. yield 2.66 t/ha, est. production 1112.4 '000 tonnes; 2024-25: est. area 327.7 '000 ha, est. yield 2.82 t/ha, est. production 924.1 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Punjab

Wheat in Punjab (ranked #1 most-grown crop in the state). Growing season: Rabi. Water requirement: Medium. Growing difficulty: Easy-Medium. Labor requirement: Medium. Profit ranking: Medium (indicative, relative to other crops). Resource notes: Needs 4-6 irrigations, moderate frost tolerance. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 1200.2 '000 ha, est. yield 2.79 t/ha, est. production 3348.6 '000 tonnes; 2021-22: est. area 1207.8 '000 ha, est. yield 2.77 t/ha, est. production 3345.6 '000 tonnes; 2022-23: est. area 1253.1 '000 ha, est. yield 3.0 t/ha, est. production 3759.3 '000 tonnes; 2023-24: est. area 1219.1 '000 ha, est. yield 2.77 t/ha, est. production 3376.9 '000 tonnes; 2024-25: est. area 1375.6 '000 ha, est. yield 2.99 t/ha, est. production 4113.0 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Rice in Punjab (ranked #2 most-grown crop in the state). Growing season: Kharif. Water requirement: Very High. Growing difficulty: Medium-Hard. Labor requirement: High. Profit ranking: Medium (indicative, relative to other crops). Resource notes: Standing water for most of the cycle, labour-intensive transplanting. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 607.8 '000 ha, est. yield 1.89 t/ha, est. production 1148.7 '000 tonnes; 2021-22: est. area 595.4 '000 ha, est. yield 1.89 t/ha, est. production 1125.3 '000 tonnes; 2022-23: est. area 563.6 '000 ha, est. yield 1.83 t/ha, est. production 1031.4 '000 tonnes; 2023-24: est. area 545.8 '000 ha, est. yield 1.92 t/ha, est. production 1047.9 '000 tonnes; 2024-25: est. area 565.1 '000 ha, est. yield 2.01 t/ha, est. production 1135.9 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Cotton in Punjab (ranked #3 most-grown crop in the state). Growing season: Kharif. Water requirement: High. Growing difficulty: Hard. Labor requirement: High. Profit ranking: High (indicative, relative to other crops). Resource notes: Long duration (5-6 months), pest-prone (bollworm), needs consistent irrigation. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 257.1 '000 ha, est. yield 2.03 t/ha, est. production 521.9 '000 tonnes; 2021-22: est. area 261.9 '000 ha, est. yield 2.05 t/ha, est. production 536.9 '000 tonnes; 2022-23: est. area 243.9 '000 ha, est. yield 2.03 t/ha, est. production 495.1 '000 tonnes; 2023-24: est. area 249.9 '000 ha, est. yield 1.99 t/ha, est. production 497.3 '000 tonnes; 2024-25: est. area 314.7 '000 ha, est. yield 1.98 t/ha, est. production 623.1 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Sugarcane in Punjab (ranked #4 most-grown crop in the state). Growing season: Year-round (12-18 month crop). Water requirement: Very High. Growing difficulty: Hard. Labor requirement: Very High. Profit ranking: Medium-High (indicative, relative to other crops). Resource notes: Heaviest water user among common crops, needs 12-18 months to mature. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 206.0 '000 ha, est. yield 2.66 t/ha, est. production 548.0 '000 tonnes; 2021-22: est. area 210.8 '000 ha, est. yield 2.69 t/ha, est.

production 567.1 '000 tonnes; 2022-23: est. area 199.1 '000 ha, est. yield 2.72 t/ha, est. production 541.6 '000 tonnes; 2023-24: est. area 245.9 '000 ha, est. yield 2.5 t/ha, est. production 614.8 '000 tonnes; 2024-25: est. area 246.4 '000 ha, est. yield 2.79 t/ha, est. production 687.5 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Rajasthan

Bajra (Pearl Millet) in Rajasthan (ranked #1 most-grown crop in the state). Growing season: Kharif. Water requirement: Low. Growing difficulty: Easy. Labor requirement: Low. Profit ranking: Low (indicative, relative to other crops). Resource notes: Highly drought-tolerant, suited to arid regions. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 1251.6 '000 ha, est. yield 1.2 t/ha, est. production 1501.9 '000 tonnes; 2021-22: est. area 1265.7 '000 ha, est. yield 1.24 t/ha, est. production 1569.5 '000 tonnes; 2022-23: est. area 1300.5 '000 ha, est. yield 1.12 t/ha, est. production 1456.6 '000 tonnes; 2023-24: est. area 1248.7 '000 ha, est. yield 1.1 t/ha, est. production 1373.6 '000 tonnes; 2024-25: est. area 906.2 '000 ha, est. yield 1.2 t/ha, est. production 1087.4 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Mustard in Rajasthan (ranked #2 most-grown crop in the state). Growing season: Rabi. Water requirement: Low-Medium. Growing difficulty: Easy. Labor requirement: Low-Medium. Profit ranking: Low-Medium (indicative, relative to other crops). Resource notes: Low water requirement, cold-tolerant oilseed. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 330.5 '000 ha, est. yield 2.51 t/ha, est. production 829.6 '000 tonnes; 2021-22: est. area 348.3 '000 ha, est. yield 2.54 t/ha, est. production 884.7 '000 tonnes; 2022-23: est. area 344.8 '000 ha, est. yield 2.55 t/ha, est. production 879.2 '000 tonnes; 2023-24: est. area 351.9 '000 ha, est. yield 2.71 t/ha, est. production 953.6 '000 tonnes; 2024-25: est. area 381.5 '000 ha, est. yield 2.65 t/ha, est. production 1011.0 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Wheat in Rajasthan (ranked #3 most-grown crop in the state). Growing season: Rabi. Water requirement: Medium. Growing difficulty: Easy-Medium. Labor requirement: Medium. Profit ranking: Medium (indicative, relative to other crops). Resource notes: Needs 4-6 irrigations, moderate frost tolerance. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 690.3 '000 ha, est. yield 2.67 t/ha, est. production 1843.1 '000 tonnes; 2021-22: est. area 677.7 '000 ha, est. yield 2.68 t/ha, est. production 1816.2 '000 tonnes; 2022-23: est. area 717.8 '000 ha, est. yield 2.58 t/ha, est. production 1851.9 '000 tonnes; 2023-24: est. area 849.5 '000 ha, est. yield 2.99 t/ha, est. production 2540.0 '000 tonnes; 2024-25: est. area 707.2 '000 ha, est. yield 2.95 t/ha, est. production 2086.2 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Guar in Rajasthan (ranked #4 most-grown crop in the state). Growing season: Kharif. Water requirement: Low. Growing difficulty: Easy. Labor requirement: Low. Profit ranking: Low-Medium (indicative, relative to other crops). Resource notes: Very drought-tolerant, suited to arid Rajasthan. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 1278.7 '000 ha, est. yield 1.74 t/ha, est. production 2224.9 '000 tonnes; 2021-22: est. area 1307.5 '000 ha, est. yield 1.72 t/ha, est. production 2248.9 '000 tonnes; 2022-23: est. area 1309.4 '000 ha, est. yield 1.76 t/ha, est. production 2304.5 '000 tonnes; 2023-24: est. area 1504.3 '000 ha, est. yield 1.83 t/ha, est. production 2752.9 '000 tonnes; 2024-25: est. area 1383.2 '000 ha, est. yield 2.04 t/ha, est. production 2821.7 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Sikkim

Maize in Sikkim (ranked #1 most-grown crop in the state). Growing season: Kharif/Rabi (both). Water requirement: Medium. Growing difficulty: Easy. Labor requirement: Medium. Profit ranking: Medium (indicative,

relative to other crops). Resource notes: Relatively hardy, moderate water needs, short duration. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 594.2 '000 ha, est. yield 2.44 t/ha, est. production 1449.8 '000 tonnes; 2021-22: est. area 613.8 '000 ha, est. yield 2.46 t/ha, est. production 1509.9 '000 tonnes; 2022-23: est. area 620.0 '000 ha, est. yield 2.46 t/ha, est. production 1525.2 '000 tonnes; 2023-24: est. area 535.2 '000 ha, est. yield 2.48 t/ha, est. production 1327.3 '000 tonnes; 2024-25: est. area 491.0 '000 ha, est. yield 2.61 t/ha, est. production 1281.5 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Ginger in Sikkim (ranked #2 most-grown crop in the state). Growing season: Kharif. Water requirement: Medium-High. Growing difficulty: Medium-Hard. Labor requirement: High. Profit ranking: Medium-High (indicative, relative to other crops). Resource notes: Needs well-drained soil, disease-prone (rhizome rot), labour-intensive. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 681.4 '000 ha, est. yield 2.92 t/ha, est. production 1989.7 '000 tonnes; 2021-22: est. area 665.8 '000 ha, est. yield 2.84 t/ha, est. production 1890.9 '000 tonnes; 2022-23: est. area 665.2 '000 ha, est. yield 2.74 t/ha, est. production 1822.6 '000 tonnes; 2023-24: est. area 663.2 '000 ha, est. yield 3.3 t/ha, est. production 2188.6 '000 tonnes; 2024-25: est. area 650.1 '000 ha, est. yield 3.2 t/ha, est. production 2080.3 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Cardamom (Large) in Sikkim (ranked #3 most-grown crop in the state). Growing season: Perennial. Water requirement: High. Growing difficulty: Hard. Labor requirement: High. Profit ranking: High (indicative, relative to other crops). Resource notes: Shade-loving perennial, needs high humidity, sensitive to weather. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 1099.4 '000 ha, est. yield 1.28 t/ha, est. production 1407.2 '000 tonnes; 2021-22: est. area 1140.1 '000 ha, est. yield 1.33 t/ha, est. production 1516.3 '000 tonnes; 2022-23: est. area 1156.9 '000 ha, est. yield 1.31 t/ha, est. production 1515.5 '000 tonnes; 2023-24: est. area 1069.3 '000 ha, est. yield 1.36 t/ha, est. production 1454.2 '000 tonnes; 2024-25: est. area 1155.9 '000 ha, est. yield 1.42 t/ha, est. production 1641.4 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Potato in Sikkim (ranked #4 most-grown crop in the state). Growing season: Rabi. Water requirement: Medium-High. Growing difficulty: Medium. Labor requirement: High. Profit ranking: Medium (indicative, relative to other crops). Resource notes: Needs cool climate, careful storage, disease-prone (blight). 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 611.2 '000 ha, est. yield 2.98 t/ha, est. production 1821.4 '000 tonnes; 2021-22: est. area 639.6 '000 ha, est. yield 2.99 t/ha, est. production 1912.4 '000 tonnes; 2022-23: est. area 606.6 '000 ha, est. yield 3.01 t/ha, est. production 1825.9 '000 tonnes; 2023-24: est. area 572.8 '000 ha, est. yield 3.1 t/ha, est. production 1775.7 '000 tonnes; 2024-25: est. area 872.9 '000 ha, est. yield 3.4 t/ha, est. production 2967.9 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Tamil Nadu

Rice in Tamil Nadu (ranked #1 most-grown crop in the state). Growing season: Kharif. Water requirement: Very High. Growing difficulty: Medium-Hard. Labor requirement: High. Profit ranking: Medium (indicative, relative to other crops). Resource notes: Standing water for most of the cycle, labour-intensive transplanting. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 1179.1 '000 ha, est. yield 2.33 t/ha, est. production 2747.3 '000 tonnes; 2021-22: est. area 1212.2 '000 ha, est. yield 2.44 t/ha, est. production 2957.8 '000 tonnes; 2022-23: est. area 1344.4 '000 ha, est. yield 2.37 t/ha, est. production 3186.2 '000 tonnes; 2023-24: est. area 1224.8 '000 ha, est. yield 2.23 t/ha, est. production 2731.3 '000 tonnes; 2024-25: est. area 1175.2 '000 ha, est. yield 2.51 t/ha, est. production 2949.8 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Sugarcane in Tamil Nadu (ranked #2 most-grown crop in the state). Growing season: Year-round (12-18 month crop). Water requirement: Very High. Growing difficulty: Hard. Labor requirement: Very High. Profit

ranking: Medium-High (indicative, relative to other crops). Resource notes: Heaviest water user among common crops, needs 12-18 months to mature. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 1562.4 '000 ha, est. yield 2.51 t/ha, est. production 3921.6 '000 tonnes; 2021-22: est. area 1591.0 '000 ha, est. yield 2.57 t/ha, est. production 4088.9 '000 tonnes; 2022-23: est. area 1681.8 '000 ha, est. yield 2.67 t/ha, est. production 4490.4 '000 tonnes; 2023-24: est. area 1716.8 '000 ha, est. yield 2.54 t/ha, est. production 4360.7 '000 tonnes; 2024-25: est. area 1764.4 '000 ha, est. yield 2.41 t/ha, est. production 4252.2 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Banana in Tamil Nadu (ranked #3 most-grown crop in the state). Growing season: Perennial. Water requirement: High. Growing difficulty: Medium-Hard. Labor requirement: High. Profit ranking: High (indicative, relative to other crops). Resource notes: Perennial crop, needs consistent irrigation, wind-sensitive. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 1565.6 '000 ha, est. yield 1.81 t/ha, est. production 2833.7 '000 tonnes; 2021-22: est. area 1517.2 '000 ha, est. yield 1.81 t/ha, est. production 2746.1 '000 tonnes; 2022-23: est. area 1571.9 '000 ha, est. yield 1.78 t/ha, est. production 2798.0 '000 tonnes; 2023-24: est. area 1352.3 '000 ha, est. yield 1.82 t/ha, est. production 2461.2 '000 tonnes; 2024-25: est. area 1880.7 '000 ha, est. yield 1.94 t/ha, est. production 3648.6 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Cotton in Tamil Nadu (ranked #4 most-grown crop in the state). Growing season: Kharif. Water requirement: High. Growing difficulty: Hard. Labor requirement: High. Profit ranking: High (indicative, relative to other crops). Resource notes: Long duration (5-6 months), pest-prone (bollworm), needs consistent irrigation. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 1323.8 '000 ha, est. yield 1.26 t/ha, est. production 1668.0 '000 tonnes; 2021-22: est. area 1345.4 '000 ha, est. yield 1.29 t/ha, est. production 1735.6 '000 tonnes; 2022-23: est. area 1433.2 '000 ha, est. yield 1.37 t/ha, est. production 1963.5 '000 tonnes; 2023-24: est. area 1550.3 '000 ha, est. yield 1.32 t/ha, est. production 2046.4 '000 tonnes; 2024-25: est. area 1484.6 '000 ha, est. yield 1.39 t/ha, est. production 2063.6 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Telangana

Rice in Telangana (ranked #1 most-grown crop in the state). Growing season: Kharif. Water requirement: Very High. Growing difficulty: Medium-Hard. Labor requirement: High. Profit ranking: Medium (indicative, relative to other crops). Resource notes: Standing water for most of the cycle, labour-intensive transplanting. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 980.9 '000 ha, est. yield 2.85 t/ha, est. production 2795.6 '000 tonnes; 2021-22: est. area 1007.4 '000 ha, est. yield 2.87 t/ha, est. production 2891.2 '000 tonnes; 2022-23: est. area 940.4 '000 ha, est. yield 2.91 t/ha, est. production 2736.6 '000 tonnes; 2023-24: est. area 922.4 '000 ha, est. yield 2.83 t/ha, est. production 2610.4 '000 tonnes; 2024-25: est. area 1025.5 '000 ha, est. yield 2.5 t/ha, est. production 2563.8 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Cotton in Telangana (ranked #2 most-grown crop in the state). Growing season: Kharif. Water requirement: High. Growing difficulty: Hard. Labor requirement: High. Profit ranking: High (indicative, relative to other crops). Resource notes: Long duration (5-6 months), pest-prone (bollworm), needs consistent irrigation. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 1223.7 '000 ha, est. yield 1.27 t/ha, est. production 1554.1 '000 tonnes; 2021-22: est. area 1234.5 '000 ha, est. yield 1.26 t/ha, est. production 1555.5 '000 tonnes; 2022-23: est. area 1253.0 '000 ha, est. yield 1.27 t/ha, est. production 1591.3 '000 tonnes; 2023-24: est. area 1309.2 '000 ha, est. yield 1.22 t/ha, est. production 1597.2 '000 tonnes; 2024-25: est. area 1361.7 '000 ha, est. yield 1.34 t/ha, est. production 1824.7 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Maize in Telangana (ranked #3 most-grown crop in the state). Growing season: Kharif/Rabi (both). Water requirement: Medium. Growing difficulty: Easy. Labor requirement: Medium. Profit ranking: Medium (indicative, relative to other crops). Resource notes: Relatively hardy, moderate water needs, short duration. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 631.4 '000 ha, est. yield 2.58 t/ha, est. production 1629.0 '000 tonnes; 2021-22: est. area 652.8 '000 ha, est. yield 2.62 t/ha, est. production 1710.3 '000 tonnes; 2022-23: est. area 667.9 '000 ha, est. yield 2.68 t/ha, est. production 1790.0 '000 tonnes; 2023-24: est. area 632.2 '000 ha, est. yield 2.62 t/ha, est. production 1656.4 '000 tonnes; 2024-25: est. area 736.2 '000 ha, est. yield 2.78 t/ha, est. production 2046.6 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Turmeric in Telangana (ranked #4 most-grown crop in the state). Growing season: Kharif. Water requirement: Medium-High. Growing difficulty: Medium. Labor requirement: High. Profit ranking: High (indicative, relative to other crops). Resource notes: Long duration (8-9 months), labour-intensive harvesting. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 1261.3 '000 ha, est. yield 2.2 t/ha, est. production 2774.9 '000 tonnes; 2021-22: est. area 1324.7 '000 ha, est. yield 2.23 t/ha, est. production 2954.1 '000 tonnes; 2022-23: est. area 1194.8 '000 ha, est. yield 2.33 t/ha, est. production 2783.9 '000 tonnes; 2023-24: est. area 1321.2 '000 ha, est. yield 1.94 t/ha, est. production 2563.1 '000 tonnes; 2024-25: est. area 1426.9 '000 ha, est. yield 2.03 t/ha, est. production 2896.6 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Tripura

Rice in Tripura (ranked #1 most-grown crop in the state). Growing season: Kharif. Water requirement: Very High. Growing difficulty: Medium-Hard. Labor requirement: High. Profit ranking: Medium (indicative, relative to other crops). Resource notes: Standing water for most of the cycle, labour-intensive transplanting. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 1392.6 '000 ha, est. yield 1.73 t/ha, est. production 2409.2 '000 tonnes; 2021-22: est. area 1492.1 '000 ha, est. yield 1.78 t/ha, est. production 2655.9 '000 tonnes; 2022-23: est. area 1440.2 '000 ha, est. yield 1.75 t/ha, est. production 2520.3 '000 tonnes; 2023-24: est. area 1489.0 '000 ha, est. yield 1.8 t/ha, est. production 2680.2 '000 tonnes; 2024-25: est. area 1415.5 '000 ha, est. yield 1.79 t/ha, est. production 2533.7 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Jute in Tripura (ranked #2 most-grown crop in the state). Growing season: Kharif. Water requirement: High. Growing difficulty: Medium-Hard. Labor requirement: High. Profit ranking: Low-Medium (indicative, relative to other crops). Resource notes: Needs standing water for retting process, labour-intensive. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 715.3 '000 ha, est. yield 1.98 t/ha, est. production 1416.3 '000 tonnes; 2021-22: est. area 733.6 '000 ha, est. yield 2.03 t/ha, est. production 1489.2 '000 tonnes; 2022-23: est. area 741.7 '000 ha, est. yield 2.08 t/ha, est. production 1542.7 '000 tonnes; 2023-24: est. area 657.5 '000 ha, est. yield 2.17 t/ha, est. production 1426.8 '000 tonnes; 2024-25: est. area 720.8 '000 ha, est. yield 2.16 t/ha, est. production 1556.9 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Rubber in Tripura (ranked #3 most-grown crop in the state). Growing season: Perennial. Water requirement: High. Growing difficulty: Hard. Labor requirement: High. Profit ranking: Medium (indicative, relative to other crops). Resource notes: Perennial plantation, 6-7 year gestation before tapping, needs high humidity. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 228.1 '000 ha, est. yield 2.0 t/ha, est. production 456.2 '000 tonnes; 2021-22: est. area 243.3 '000 ha, est. yield 2.03 t/ha, est. production 493.9 '000 tonnes; 2022-23: est. area 240.9 '000 ha, est. yield 1.93 t/ha, est. production 464.9 '000 tonnes; 2023-24: est. area 273.9 '000 ha, est. yield 2.29 t/ha, est. production 627.2 '000 tonnes; 2024-25: est. area 247.7 '000 ha, est. yield 2.04 t/ha, est. production 505.3 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Pineapple in Tripura (ranked #4 most-grown crop in the state). Growing season: Perennial. Water requirement: Medium. Growing difficulty: Medium. Labor requirement: Medium-High. Profit ranking: Medium (indicative, relative to other crops). Resource notes: Perennial, moderately hardy, 18-20 month maturity. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 395.9 '000 ha, est. yield 1.72 t/ha, est. production 680.9 '000 tonnes; 2021-22: est. area 418.9 '000 ha, est. yield 1.76 t/ha, est. production 737.3 '000 tonnes; 2022-23: est. area 388.4 '000 ha, est. yield 1.85 t/ha, est. production 718.5 '000 tonnes; 2023-24: est. area 376.0 '000 ha, est. yield 1.75 t/ha, est. production 658.0 '000 tonnes; 2024-25: est. area 442.8 '000 ha, est. yield 1.92 t/ha, est. production 850.2 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Uttar Pradesh

Sugarcane in Uttar Pradesh (ranked #1 most-grown crop in the state). Growing season: Year-round (12-18 month crop). Water requirement: Very High. Growing difficulty: Hard. Labor requirement: Very High. Profit ranking: Medium-High (indicative, relative to other crops). Resource notes: Heaviest water user among common crops, needs 12-18 months to mature. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 795.5 '000 ha, est. yield 1.06 t/ha, est. production 843.2 '000 tonnes; 2021-22: est. area 804.1 '000 ha, est. yield 1.05 t/ha, est. production 844.3 '000 tonnes; 2022-23: est. area 835.6 '000 ha, est. yield 1.18 t/ha, est. production 986.0 '000 tonnes; 2023-24: est. area 783.7 '000 ha, est. yield 1.05 t/ha, est. production 822.9 '000 tonnes; 2024-25: est. area 882.1 '000 ha, est. yield 1.15 t/ha, est. production 1014.4 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Wheat in Uttar Pradesh (ranked #2 most-grown crop in the state). Growing season: Rabi. Water requirement: Medium. Growing difficulty: Easy-Medium. Labor requirement: Medium. Profit ranking: Medium (indicative, relative to other crops). Resource notes: Needs 4-6 irrigations, moderate frost tolerance. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 1030.6 '000 ha, est. yield 2.53 t/ha, est. production 2607.4 '000 tonnes; 2021-22: est. area 1019.2 '000 ha, est. yield 2.55 t/ha, est. production 2599.0 '000 tonnes; 2022-23: est. area 1074.4 '000 ha, est. yield 2.47 t/ha, est. production 2653.8 '000 tonnes; 2023-24: est. area 1118.9 '000 ha, est. yield 2.48 t/ha, est. production 2774.9 '000 tonnes; 2024-25: est. area 1248.7 '000 ha, est. yield 2.67 t/ha, est. production 3334.0 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Rice in Uttar Pradesh (ranked #3 most-grown crop in the state). Growing season: Kharif. Water requirement: Very High. Growing difficulty: Medium-Hard. Labor requirement: High. Profit ranking: Medium (indicative, relative to other crops). Resource notes: Standing water for most of the cycle, labour-intensive transplanting. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 1205.5 '000 ha, est. yield 2.59 t/ha, est. production 3122.2 '000 tonnes; 2021-22: est. area 1188.7 '000 ha, est. yield 2.63 t/ha, est. production 3126.3 '000 tonnes; 2022-23: est. area 1102.1 '000 ha, est. yield 2.73 t/ha, est. production 3008.7 '000 tonnes; 2023-24: est. area 1092.2 '000 ha, est. yield 2.79 t/ha, est. production 3047.2 '000 tonnes; 2024-25: est. area 1179.9 '000 ha, est. yield 2.86 t/ha, est. production 3374.5 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Potato in Uttar Pradesh (ranked #4 most-grown crop in the state). Growing season: Rabi. Water requirement: Medium-High. Growing difficulty: Medium. Labor requirement: High. Profit ranking: Medium (indicative, relative to other crops). Resource notes: Needs cool climate, careful storage, disease-prone (blight). 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 634.4 '000 ha, est. yield 2.9 t/ha, est. production 1839.8 '000 tonnes; 2021-22: est. area 645.9 '000 ha, est. yield 2.92 t/ha, est. production 1886.0 '000 tonnes; 2022-23: est. area 653.9 '000 ha, est. yield 2.85 t/ha, est. production 1863.6 '000 tonnes; 2023-24: est. area 740.7 '000 ha, est. yield 2.9 t/ha, est. production 2148.0 '000 tonnes; 2024-25: est. area 682.6 '000 ha, est. yield 2.84 t/ha, est. production 1938.6 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Uttarakhand

Wheat in Uttarakhand (ranked #1 most-grown crop in the state). Growing season: Rabi. Water requirement: Medium. Growing difficulty: Easy-Medium. Labor requirement: Medium. Profit ranking: Medium (indicative, relative to other crops). Resource notes: Needs 4-6 irrigations, moderate frost tolerance. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 1004.1 '000 ha, est. yield 2.74 t/ha, est. production 2751.2 '000 tonnes; 2021-22: est. area 1032.5 '000 ha, est. yield 2.81 t/ha, est. production 2901.3 '000 tonnes; 2022-23: est. area 1046.9 '000 ha, est. yield 2.85 t/ha, est. production 2983.7 '000 tonnes; 2023-24: est. area 1017.3 '000 ha, est. yield 2.48 t/ha, est. production 2522.9 '000 tonnes; 2024-25: est. area 1206.6 '000 ha, est. yield 3.01 t/ha, est. production 3631.9 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Rice in Uttarakhand (ranked #2 most-grown crop in the state). Growing season: Kharif. Water requirement: Very High. Growing difficulty: Medium-Hard. Labor requirement: High. Profit ranking: Medium (indicative, relative to other crops). Resource notes: Standing water for most of the cycle, labour-intensive transplanting. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 1018.0 '000 ha, est. yield 2.01 t/ha, est. production 2046.2 '000 tonnes; 2021-22: est. area 1016.8 '000 ha, est. yield 2.02 t/ha, est. production 2053.9 '000 tonnes; 2022-23: est. area 1134.5 '000 ha, est. yield 1.94 t/ha, est. production 2200.9 '000 tonnes; 2023-24: est. area 1198.0 '000 ha, est. yield 1.99 t/ha, est. production 2384.0 '000 tonnes; 2024-25: est. area 966.0 '000 ha, est. yield 2.31 t/ha, est. production 2231.5 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Sugarcane in Uttarakhand (ranked #3 most-grown crop in the state). Growing season: Year-round (12-18 month crop). Water requirement: Very High. Growing difficulty: Hard. Labor requirement: Very High. Profit ranking: Medium-High (indicative, relative to other crops). Resource notes: Heaviest water user among common crops, needs 12-18 months to mature. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 222.4 '000 ha, est. yield 2.4 t/ha, est. production 533.8 '000 tonnes; 2021-22: est. area 234.8 '000 ha, est. yield 2.4 t/ha, est. production 563.5 '000 tonnes; 2022-23: est. area 237.0 '000 ha, est. yield 2.51 t/ha, est. production 594.9 '000 tonnes; 2023-24: est. area 222.9 '000 ha, est. yield 2.52 t/ha, est. production 561.7 '000 tonnes; 2024-25: est. area 239.9 '000 ha, est. yield 2.39 t/ha, est. production 573.4 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Potato in Uttarakhand (ranked #4 most-grown crop in the state). Growing season: Rabi. Water requirement: Medium-High. Growing difficulty: Medium. Labor requirement: High. Profit ranking: Medium (indicative, relative to other crops). Resource notes: Needs cool climate, careful storage, disease-prone (blight). 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 1064.1 '000 ha, est. yield 1.76 t/ha, est. production 1872.8 '000 tonnes; 2021-22: est. area 1071.8 '000 ha, est. yield 1.82 t/ha, est. production 1950.7 '000 tonnes; 2022-23: est. area 1121.1 '000 ha, est. yield 1.86 t/ha, est. production 2085.2 '000 tonnes; 2023-24: est. area 1253.3 '000 ha, est. yield 1.88 t/ha, est. production 2356.2 '000 tonnes; 2024-25: est. area 1491.8 '000 ha, est. yield 1.72 t/ha, est. production 2565.9 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

West Bengal

Rice in West Bengal (ranked #1 most-grown crop in the state). Growing season: Kharif. Water requirement: Very High. Growing difficulty: Medium-Hard. Labor requirement: High. Profit ranking: Medium (indicative, relative to other crops). Resource notes: Standing water for most of the cycle, labour-intensive transplanting. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 1284.6 '000 ha, est. yield 1.04 t/ha, est. production 1336.0 '000 tonnes; 2021-22: est. area 1342.3 '000 ha, est. yield 1.07 t/ha, est. production 1436.3 '000 tonnes; 2022-23: est. area 1300.9 '000 ha, est. yield 1.13 t/ha, est. production 1470.0 '000 tonnes; 2023-24: est. area 1218.7 '000 ha, est. yield 1.13 t/ha, est. production 1377.1 '000 tonnes; 2024-25: est. area 1473.1 '000 ha, est.

yield 1.16 t/ha, est. production 1708.8 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Potato in West Bengal (ranked #2 most-grown crop in the state). Growing season: Rabi. Water requirement: Medium-High. Growing difficulty: Medium. Labor requirement: High. Profit ranking: Medium (indicative, relative to other crops). Resource notes: Needs cool climate, careful storage, disease-prone (blight). 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 1736.1 '000 ha, est. yield 2.71 t/ha, est. production 4704.8 '000 tonnes; 2021-22: est. area 1813.4 '000 ha, est. yield 2.68 t/ha, est. production 4859.9 '000 tonnes; 2022-23: est. area 1804.9 '000 ha, est. yield 2.86 t/ha, est. production 5162.0 '000 tonnes; 2023-24: est. area 1587.9 '000 ha, est. yield 2.45 t/ha, est. production 3890.4 '000 tonnes; 2024-25: est. area 1937.2 '000 ha, est. yield 2.83 t/ha, est. production 5482.3 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Jute in West Bengal (ranked #3 most-grown crop in the state). Growing season: Kharif. Water requirement: High. Growing difficulty: Medium-Hard. Labor requirement: High. Profit ranking: Low-Medium (indicative, relative to other crops). Resource notes: Needs standing water for retting process, labour-intensive. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 1427.0 '000 ha, est. yield 2.77 t/ha, est. production 3952.8 '000 tonnes; 2021-22: est. area 1448.4 '000 ha, est. yield 2.74 t/ha, est. production 3968.6 '000 tonnes; 2022-23: est. area 1344.6 '000 ha, est. yield 2.88 t/ha, est. production 3872.4 '000 tonnes; 2023-24: est. area 1506.1 '000 ha, est. yield 2.92 t/ha, est. production 4397.8 '000 tonnes; 2024-25: est. area 1372.5 '000 ha, est. yield 2.73 t/ha, est. production 3746.9 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]

Tea in West Bengal (ranked #4 most-grown crop in the state). Growing season: Perennial. Water requirement: High. Growing difficulty: Hard. Labor requirement: Very High. Profit ranking: Medium (indicative, relative to other crops). Resource notes: Perennial plantation crop, needs consistent rainfall/irrigation and skilled plucking labour. 5-year estimated trend (2020-21 to 2024-25) - 2020-21: est. area 1355.3 '000 ha, est. yield 2.73 t/ha, est. production 3700.0 '000 tonnes; 2021-22: est. area 1396.9 '000 ha, est. yield 2.78 t/ha, est. production 3883.4 '000 tonnes; 2022-23: est. area 1583.0 '000 ha, est. yield 2.64 t/ha, est. production 4179.1 '000 tonnes; 2023-24: est. area 1553.9 '000 ha, est. yield 2.8 t/ha, est. production 4350.9 '000 tonnes; 2024-25: est. area 1464.6 '000 ha, est. yield 2.53 t/ha, est. production 3705.4 '000 tonnes. [Area/yield/production figures are estimated illustrative trends, not official statistics. Profit ranking is an indicative relative rating. See Section 2 for methodology.]
